# OUR SEED WAREHOUSE. LOADING OUT FOR THE DEPOTS."

FROM A PHOTOGRAPH.

# To Seed Buyers.

One class caters to the patronage of those who are misled by overdrawn pictures and stacements that are deliberately un-

Another class takes advantage of the fears of those who, through their natural desire to secure the best seeds, will pay fancy prices for what often proves to be very ordinary stock.

There is yet another class which seeks the trade of those who want the best seels possible the narrange and are willing to ray.

with want the best seeds passible to prove the principle of the provided and are willing to pay a reasonable price for them. To this class our Catalogue heliugs. Our seeds we believe to he as good as can be obtained anywhere.

Our descriptions are brief and

accurate.
Our illustrations are true to

Our prices are reasonable.

We trust that our efforts to simplify the task of selection and dignify the sale of seeds will meet with the approval of intelligent purchasers.

Respectfully

Respectfully,

Northrup, King & Co.

Minneapalis, Minu., Jan. 1, 1900.

# Modes of Ordering and Sending Money.

SEEDS BY MAIL.—Please remember that our prices include PREPAYNENT OF POSTAGE by us on all Seeds ordered by the PACKET, OUNCE, POUND, PINT or QUART; also on PLANTS and BULBS. Deduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight.

\*\*\*\* We guarantee the safe delivery of all Seeds sent by mail.

\*\*\*\*EEDS BY EXPRESS OR FREIGHT.—We deliver Seeds to any Express or Railroad Company in Minneapolis, the purchaser to pay transportation charges upon the receipt of goods.

\*\*\*\*Preduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight. When possible, give full shipping instructions. In the absence of these particulars, we will use our best judgment. No charge for Bags, Boxes or Cartage on Seeds bought at prices herein named.

\*\*PURCHASING BY EXPRESS.—Express Offices have now purchasing departments in all their offices. If you wish to order goods from us to be sent by Express, ask for a purchasing order blank at any Express Office, and it will be supplied and forwarded by them without extra charge, other than the usual rates for returning goods.

\*\*NAME, ADDRESS, ETC.—When ordering, give name and full address. Many orders reach us every season in which the Name or Post Office address is lacking. It is, of course, impossible for us to fill these orders until they are identified.

\*\*HOW TO SEND MONEY.—Noney can be sent safely either by P. O. Order, Bank Draft, Express Order or Registered Letter. If your order amounts to \$1.00 or more, it is best to send by one of the above methods. Postage Stamps received the same as Cash.

# Morthrup, King & Co.'s Primers.

Our primary object in issuing the PRIMERS, which have become so popular, is to obtain new enstoners. We are in hopes that the desire to obtain the Primers will turn some orders our way that might otherwise go elsewhere, for once we secure a customer, we usually manage to keep him. These Primers, therefore, will positively not be suld, but will be sent only to those who purchase seeds from this catalogue to the value of 50 CENTS.

# PRIMER No. 1.

# SHAWS NEW SYSTEM OF PASTURING SHEEP. By Thos. Shaw.

Is from the pen of Prof. Thos. Shaw, of the University of Minnesota. It treats of the pasturing of sheep on foods sown for them, other than grasses. The grazing of sheep on grasses is as old as the world, but pasturing them chiefly on foods other than grasses is an entirely new system, hence the name given to the book. In this book Prof. Shaw gives his experience in growing these foods and in pasturing sheep on them. This existem will, without doubt, in the near future revalutionize the method of growing sheep in nll the arable sections in the United States. The experience, thought and labor of many years are condensed in this book. Applied, it will mean millions at dollars to the farmers of this country.

## PRIMER No. 2.

# HINTS ON GRASS AND CLOVER SEEDS. By W. J. Beal.

This has been written for us by Praf. W. J. Beal, of the Michigan Agricultural College, author of Grasses of North America, and the highest living anth privoc the subject. It will be found that this Primer contains information vital to every one who saws grass and clover seeds, no matter how experienced they may be. Remember that these "Primers" do not cost our enstances one cent.

FREIGHT RATES REDUCED ONE-HALF

MINNEAPOLIS to the NORTHWEST

Grass Seed, Clover Seed, Millet Seed & Dwarf Essex Rape Seed.

will be discontinued after June 30th, 1900.
Very truly yours,
GEO. O. SOMERS, St. Paul, Minn.,
General Freight Agent, Great Northern Ry.
S. L. MOORE, St. Paul, Minn.,
General Freight Agent, Northern Pacific Ry.
W. L. MARTIN, Minneapolis, Minn.,
Gen'l Fgt. Agt., Minneapolis, St. P. & S. Ste. Marie Ry."

It affords us genuine pleasure to make the above announcement, and we experience no little satisfaction in having secured, unassisted, such an important concession from the railroads. It means a saving of thousands of dollars, which would otherwise be paid out for freight by Northwestern farmers, and we hope all who can possibly do so will avail themselves of this exceptional opportunity to establish a large acreage of the tame grasses and clovers.

We are not asking any "bouquets" for ourselves in having secured this reduction, but we do hope that each one benefited by this special rate will write a letter of appreciation to the general freight agent of the road over which his seed arrives.

Railroads are accustomed to abuse. Sometimes they deserve it and comptimes they deserve

Railroads are accustomed to abuse. Sometimes they deserve it and sometimes they do not. In this instance they are certainly entitled to commendation for the broad view they have taken of the situation. We want them to know that it is appreciated, and letters of that kind will encourage them and pave the way, we hope, for still greater and more general concessions.

Please note that this rate will take effect February 1st, 1900, and that it will be discontinued

June 30th, 1900.

IMPORTANT NOTICE! Customers who do not live on the lines of the above mentioned railroads will not, of course, be benefited by the half rates. We are sorry that the reduction could not have been made more general, but we are glad to have accomplished this much. All will be benefited, however, wherever they live, who use our "Sterling" grades of Grass, Clover and Field Seeds. 

OUR SEEDS. **OUR PRICES** 

It is our aim to have them the BEST money can buy, anywhere, at any price.

Will be found very reasonable. If they appear high in any instance, we will consider it a favor if our customers will advise us. It is

our aim to meet the competition of all reliable firms.

OUR PREMIUMS AND As a premium on orders for seeds in packets amounting to at least 75 cents, we give (if requested) a package of our School Garden Flower Mixture. The possession of this package entitles the holder to compete for the \$200.00 cash prizes. For particulars see pages 47, 48, 49 and 50.

N., K. & Co.'s Primer No. 1-Shaw's New System of Pasturing Sheep. OUR PRIMERS FREE N., K. & Co.'s Primer No. 2—BEAL'S HINTS ON GRASSES AND CLOVERS. N., K. & Co.'s Primer No. 3—THE LAWN. TO CUSTOMERS.

Are sent FREE to customers who request them.

SATISFACTION GUARANTEED. Purchasers ordering our best grades may return them at our expense if not found entirely satisfactory on receipt and examination, and the money that has been paid for seed and freight will be promptly refunded.

OUR RESPONSIBILITY. As to our responsibility and reliability, we refer to the Commeracial Agencies, any Bank or Wholesale House, Express or Freight Agent in Minneapolis, or to the Postmaster of this city.

# PERFECTED FARM SEEDS.

# FROM THE WORLD'S GOLDEN GRAIN BELT.

MR. JAS J. HILL, Prest. Great Northern R. R.

"It is well understood that the farther North either animal or vegetable life is developed, the better that development is,"—Jas. J. Hill. (Extract from an address.)

It is a well established principle of agriculture that the farther North seeds can be grown and fully matured, the better they are. While this truth applies with equal force to nearly every kind of seed, the Northwest became so quickly famous for its cereals as to cause farmers everywhere to turn here for their supplies in that direction. This tendency has become so well recognized amongst the trade that many scedsmen of the East and Middle West have almost dropped Field Seeds from their catalognes.

The whole drift of trade towards the natural source of supply has led us to devote unusual attention to the culture of

The whole drift of trade towards the natural source of supply has led us to devote unusual attention to the culture of improved firm seeds, the result being that we have become the largest growers in the United States of fine seed grain, etc. All practical farmers agree that seed, grown year after year under the same conditions of soil and climate, "runs out" after a time, rendering a change of seed not only desirable but necessary. To such we offer Northern Grown stocks of the best varieties, carefully selected, thoroughly re-cleaned, and at prices so reasonable as to enable every farmer who wishes to get a new start in seed oats, wheat, barley, corn, etc., to do so at a very small expense.

Please note our liberal terms of sale, viz: If any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense and the money that has been paid for them will be refunded.

Messrs. Northrup, King & Co..

26 Hennepin Avenue, Minneapolis, Minn.

Gentlemen; Permit me to thank you heartly for the exceptionally fine consignment of potatoes sent me, and which you did me the honor to name Pingreo Potatoes.

I trust that the farmers who plant them and Introduce them to the markets may have an abundant harvest, and that the potatoes may have a flavor and quality equal to those you sent me.

Your respect fully,

H. S. PINGREE.

If FINE TABLE and LONG KEEPING qualities, combined with GREAT PRODUCTIVENESS, ever warranted the introduction of a potato, we are justified in sending out the PINGREE, believing that it will find favor with all who grow it, and that it will take care of itself in the battle for popular favor.

The PINGREE is a main crop potato; is productive to an extraordinary degree. The tubers are bunched closely in growing, which materially lessens the labor of harvesting. The potato itself is of the size and shape best liked in the leading markets. The skin is of a bright, light russet color. Eyes are few and nearly finsh with the surface. In quality nothing can surpass it. In fact, in this particular we know of no sort that equals it. Its snowy whiteness when cooked, together with its dry and thoury nature, has made it a favorite on every table where it has been tried. where it has been tried.

## PRICE.

The very reasonable price at which we offer this potato will enable all who are disposed to try it to do so without paying the extravagant rates usually asked for new varieties. We are sure that all who try them will be greatly pleased with their investment. Pound, 20c; three pounds, 50c; postage paid. By express or freight at purchaser's expense, peck, 60c; bu., \$2.00; barrel of three bu., \$5.00.

PINGREE POTATO EYES BY MAIL. It has been conclusively proven that potatoes ent to single eyes give the largest yields and best results generally. They can be sent without danger of freezing, and by our improved method of preparing for shipment, will keep in good condition for months. One hundred eyes of the PINGREE potato will be sent postpaid to any address on receipt of One Dollar, and are warranted to reach the purchaser in good condition for planting.

# Northern Grown Seed Potatoes.

No Potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDOM FROM DISEASE, or PRODUCING and LONG KEEPING QUALITIES. Our stock is so fine and our prices so low that it is a particularly favorable time to get into a stock of some of the A Barrel of Potatoes is sometimes an UNKNOWN QUANTITY. OUR newer and better sorts. BARRELS contain plump 3 BUSHELS.

SAIPMENT will be made at any date ordered, but where no special instructions to the contrary are given, will hold until in our judgment there will be no danger from freezing. Write for special prices on carload or large lots.

Northrup, King & Co.'s Extra Early Ohio.

# NORTHRUP, KING & CO.'S EXTRA EARLY OHIO POTATOES.

OUR OWN SPECIAL STOCK. We consider these to be the earliest, purest, and altogether the handsomest stock of Early Ohio Potatoes to be found anywhere. On these points we challenge comparison with stock from any other sonree. We do not admit that its equal exists among Early Ohio Potatoes. They are grown under conditions that make them cost more than common stock. They are selected with the utmost care, and the result is grand, such as to delight everyone who knows and appreciates a good potato. Everyone of them is a "picture" of what an Early Ohio Potato should be. Stock Limited. 100 eyes, by mail, postpaid, 80c; by freight, peck, 40c; bu, \$1.25; bbl., \$3.50.

EARLY OHIO. We do not now grow our Early

treight, peck, 40e; bu., \$1.25; bbl., \$3.50.

EARLY OHIO. We do not now grow our Early Ohio Potatoes. Minneapolis is such a large seed potato receiving market and shipping point that we have found it to be a better plan to select each year a few carloads of Ohios out of the many coming each day during the fall and early winter. In this way we have our pick out of many thousands of bushels, and we usually have better stock than if we felt obliged to first dispose of those of our own growth. Our stock will please the buyer. 100 eyes, by mail, postpaid, 60e; peck, 35e; bu., \$1.00; bbl., \$3.00.

# EYTDA EADLY VADIETIES

| EXIRA EARLY VARIETIES.   |            |        |              |
|--|------------|--------|--------------|
| (Our Barrels Hold Plump 3 BUSHELS.)  |            |        |              |
| EARLY FORTUNE. (New.) A very early variety, sent out with extraordinary claims as to its   | Pk.        | Bu.    | Bbl.         |
| yielding qualities. It is distinctive in appearance, being longish; flesh and skin white and very attractive. Eyes very prominent  | 50e        | \$1.25 | \$3.50       |
| of marketable size in six weeks after planting. Our trials hardly justify this claim, but it is  |            |        |              |
| certainly a very early and very good potato. Is of excellent quality and yields  | 40         | 1.10   | 3.00         |
| abundantly   | 20         | ****   | 0.00         |
| its earliness, productiveness, uniformity in size and admirable cooking qualities. When boiled its flesh is almost as white as milk; baked, it has no superior. The uniformity and   |            |        |              |
| size is a feature that will be appreciated by all potato growers   | 50         | 1.10   | 3.00         |
| that are being constantly introduced, there are a great many who contend that Early Rose   |            |        |              |
| is the peer of them all. It is certainly true that a pure, healthy stock of Early Rose potatoes has been difficult to obtain. In our judgment the Montana Rose will fully satisfy those who  |            |        |              |

### POTATO EYES

We believe that we are the originators of the system of sending potato eyes by mail. There are numerous advantages in procuring them in this shape.

FIRST.—It has been conclusively proven that potatoes cut to single eyes give the largest yields and best results generally.

Second.—No freight charges to pay.

THIRD.—They can be sent without danger of freezing. A customer can secure them in ample time for planting without incurring this risk.

FOURTH.—By our improved method of preparing the eyes for shipment, they will keep in good condition for months.

We guarantee safe arrival, in good condition for growing.

The splendid collection above offered consists of 25 eyes each of the following sorts. They, in our judgment,

The spiendia conection above onered consists of \$25 eyes each of the following sorts. They, in our judgment, constitute the cream of all the potatoes in the market to-day.

NORTHRUP, KING & CO.'S "EXTRA EARLY OHIO," the purest and earliest stock of Ohio potatoes in existence.

"EXTRA EARLY TRIUMPH," The sensational sort. Proven to be seven to ten days earlier than the Early Ohio.

NORTHRUP, KING & CO.'S "PINGREE." The best main crop potato. Everybody is delighted with the "Pringree." It is a heavy cropper. Incomparably attractive in appearance. Eyes few and flush with surface. Skin, light russet. Clean and handsome. Snow white, dry and floury when cooked.

"CARMAN NUMBER 3." The best of all the Carman introductions. A late variety, a most extraordinary cropper and long keeper.

We will mail 25 eyes each of the above on receipt of only \$1.00.

That we guarantee safe arrival in good growing condition and that they are so prepared as to keep for several months without harm.

### EXTRA EARLY TRIUMPH. (Bliss.)

This variety has been known for a long time, and yet "unknown," It was introduced many years ago by Mr B. K. Bliss, of New York, who disseminated the Early Rose. The Triumph attained at the time no particular favor, but all of a sudden its virtues became appreciated and the demand for it season before last was so great that it sold readily in carload lots for three times the price of ordinary seed potatoes, and one man who held several thousands reaped a substantial fortune from their sale. There is good reason why the Triumph should be popular. It is from seven to ten days earlier than the Ohlo, and that oftentimes means a difference of many dollars in the crop. We believe that potato growers will do well to plant liberally of them the coming spring, as there is sure to be an almost unlimited demand for the seed from the Mississippi Valley, where thousands upon thousands of acres of potatoes are grown each year for the early market. The potato is of good size, squared at ends. Skin is red, flesh is very white and firm. It is productive, and for several years to come will probably command a higher price among potato buyers than any other sort. Our stock is genulue. Price, 100 eyes, \$1.00, by mail postpaid. By freight, peck, 60e; bu., \$1.75; bbl. (3 bu.), \$4.50; in 10 bbl. lots @4.00.

DR. C. J. ALLOWAY.

The following statement from one of the most prominent authorities on Agriculture in the Northwest speaks volumes in showing the superior quality of our swedish turnips (RUTA BAGAS), MANGEL and other ROOT SEEDS:

"For eight years I have used your seeds with the greatest success. I wish especially to commend your MANGEL and RUTA BAGA SEED as the BEST I EVER USED. My experience in farming covers a period of over 20 years, during which time I have rarely cultivated less than TEN TO TWENTY ACRES OF MANGEL WURZEL AND SWEDISH TURNIP. As a stock breeder, I have always considered them my most important crops. I have bought seed from nearly every prominent house in the United States and Canada, and sometimes have imported it direct from England, but never have I hAD THE UNIFORMLY GOOD RESULTS that YOUR SEED has GIVEN ME. In North Dakota, where I had the largest herd of thoroughbred cattle, I AVERAGED from 20 to 30 TONS OF ROOTS to the ACRE. Later, as manager of Mr. J. J. Hill's stock farm at North Oaks, my tonnage was not quite as heavy, owing to the lighter character of the soil, but in SHAPE, SIZE and UNIFORMITY the roots have always been as nearly perfect as any man could wish.

\*\*Yours, etc.,\*\* C. J. ALLOWAY."

NOTE.—We value very highly the above expression from Dr. Alloway, who was State Veterinarian for North Dakota for three years; for a long time President of the Fine Stock Growers' Association of North Dakota; Lecturer to State Agricultural College at Brookings, S. D.; Director in Grand Forks County Agricultural Society, and one of the largest, most progressive and successful stock breeders in the United States.

N., K. & CO.'S PRIZE WINNER RUTA BAGA. Prize Winner is a purple-topped variety, growing to a large size, with a single tap root and very small and fine top, short neck, smooth and symmetrical; is a certain cropper. It produces a very heavy weight per acre, and keeps sound and good until late in the Spring. From reports received from those who have grown it, we do not hesitate to say that we possess the handsomest and best stock of purple top Ruta Bagas in cultivation. We have sold many thousand pounds of this magnificent strain and have never received a single complaint about them. Large pkt., 5c; oz., 10c; ½ lb., 15c; lb., 50c, postpaid. By freight, lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.25.

CARTER'S IMPERIAL HARDY SWEDE. A standard English variety which produces extraordinary crops. Large pkt., 5c; oz., 10c; ½ lb., 15c; lb., 40c, postpaid. By freight, lb., 30e; 10 lbs. @ 25c.

SWEET GERMAN. One of the very best sorts on account of its productiveness and quality. This consideration should count strongly with stock growers, all of whom understand that the quality of the feed regulates the quality of the product. Large pkt., 5c; oz., 10c; ½ lb., 20c; lb., 50c, postpaid. By express or freight, lb., 40c; 5 lbs., \$1.75.

\*\*THURST'S MONARCH SWEDE. We first saw this splendid variety in England, and were the first to bring it to the attention of the American trade. It is very distinct in type, being of tankard shape. On account of the size it attains, it will yield from two to seven tons more to the acre than any other variety. Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 60c, postpaid. By express or freight, lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

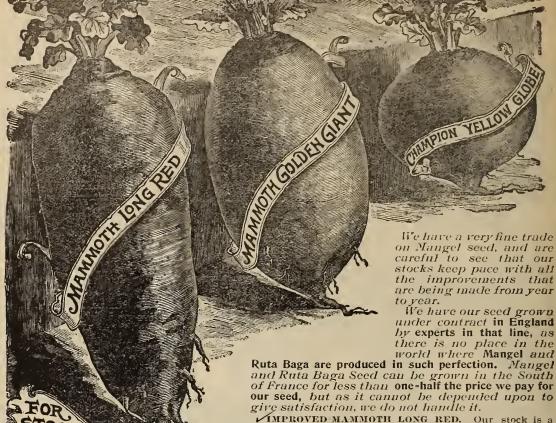

# SUGAR BEET.

KLEIN WANZLEBENER AND VILMORIN'S have thus far proven most successful for this country. Our stocks of these two celebrated sorts are known as "Elite" Strains, meaning choice; select. This Elite seed is grown only from roots (each of which is analyzed) which show the highest percentage of sugar and co-efficient of purity. The Elite strains are the only onest hat should be planted by those wishing to grow high grade sugar beets. VILMORIN-ELITE. This beet is the result of thirty-five years of methodic and perseverving selection. In black soils, rich in organic matter, it gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the percentage of sugar which can be obtained from this variety is about sixteen. Its average yield may be stated as from 12 to 16 tons per acre. Pound, 45c, postpaid. By express or freight, lb., 35c; 5 lbs. @ 30c; 10 lbs. @ 25c; 100 lbs. @ 20c. Bags included.

KLEIN WANZLEBENER-ELITE. This variety at the present time has probably a wider cultivation than any other sugar beet. It may be distinguished from the Vilmorin by its brighter color and its lighter colored leaves, which are beautifully undulating, and scalloped about the edges. While not, as a rule, equal to the Vilmorin in saccharine richness, it is considerably more productive. Pound, 45c, postpaid. By express or freight, lb., 35e; 5 lbs. @ 36e; 10 lbs. @ 25c; 100 lbs. @ 26c. Bags included.

# Sugar beet for Stock feeding.

We can furnish ordinary seed of Klein Wanzlebener, Vilmorin, Lane's Improved, Imperial and French White Sugar at the following prices: Lb., 30c, postpaid. By express or freight, lb., 20c; 5 lbs. @ 18c; 10 lbs. @ 15c; 100 lbs. @ 10c. Bags included. In ordering, state variety wanted.

IMPROVED MAMMOTH LONG RED. Our stock is a great improvement on the old variety. The roots are very large, uniformly straight and well formed. Color deep red. Roots solid. Tops small. Roots attain a large size. Produce or freight, lb., 30e; 5 lbs. @ 25e.

MAMMOTH GOLDEN GHANT MANGEL. Very large. Remarkably even in shape, of vigorous growth; has a fine neck and a very smooth skin. Flesh white, firm and sweet, much liked by cattle. Easily lifted from the ground, producing enormous crops. Excellent keeper, yields \$0 to 60 tons per acre. Oz., 5e; \$4 lb., 15e; lb., 45e, postpaid. By freight, lb., 35e; 5 lbs. @ 30e.

RED GLOBE MANGEL. Similar to the Yellow Globe in general character, and, like it, well adapted to shallow soils. Oz., 10e; \$4 lb., 15e; lb., 40e. By freight, lb., 30e; 5 lbs. @ 25e.

CHAMPION YELLOW GOLBE MANGEL. A favorite variety, very productive, easily pulled and a good keeper. It is spherical in shape, orange yellow color, top tinged with green; flesh of the root white, firm and sngary. One of the best for light soils. Oz., 10e; \$4 lb., 15e; lb., 40e, postpaid. By freight, lb., 30e; 5 lbs.

TABER'S GATE POST MANGEL. This is the production of one of the largest mangel specialists of England. It is thought has production of one of the largest

TABER'S GATE POST MANGEL. This is the production of one of the largest mangel specialists of England. It is thought by many to be the most profitable of all mangels, and is exceedingly popular in those sections where it is best known. It resembles somewhat the Golden Tankard in appearance, but is not so large; skin is yellow and smooth; flesh white and very firm. Oz., 5c; ½ lb., 15c; b. 45c, postpaid. By express or freight, lb., 35c; 5 lbs. @ 30c.

IMPROVED GOLDEN TANKARD. We have for years insisted that this was the best mangel grown, and each season strengthens us in the position we took when it was a comparatively unknown sort. We recommend it unqualifiedly as the best mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a mangel. The illustration (engraved from a photograph) shows the shape. The color is a deep rich yellow. The flesh is yellow and white in rings beautifully alternating with each other. On account of its shape enormous crops are grown, and it is easily lifted from the ground. Oz. 5c; ½ lb., 15c; lb., 40c, postpaid. By express or freight, lb., 30c; 5 lbs. @ 25c.

# "OVER PRODUCTION."

"The Seeds I received from you last year gave splendid satisfaction. I raised MASTODON CARROTS that weighed from 41/4 to 43/4 lbs., several Danver'S Half Long Carrots that weighed over three LBS., and GOLDEN TANKARD MANGELS from 10 to 12 inches in diameter C. J. FINCH, Beulah, Wyo. and from 20 to 25 lbs. in weight.

Proprietor of the Meadow Lawn Stock Farm, St. Cloud, Minn.

It is no exaggeration to say that we could fill a closely printed book much larger than this catalogue with testimonials in praise of our Mastodon and Victoria Carrots. All, without exception, unite in pronouncing them the grandest of all Carrots for stock.

# \$500 Cash.

On Nov. 23, 1893, we paid this amount to the following successful competitors, for the largest yields from a SINGLE BUSHEL of N., K. & CO.S LINCOLN OATS.

A. M. Hightower, 1st prize, 174.19 bash. \$200.00 G. L. Gordon, 2d 168.22 bush. 46 J. F. Wood, 3d 123.08 bush. 75.00 R. L. Bradley, 4th 120.13 bush. 60.00 5th " Wm. Gans, 78.18 bash. 35.00 R. N. Lewis, 6th " 76.16 busb. 20 00 7th " James Young, 75.21 bush.

From the above list of prize ners it will be seen that the total yield from 7 bushels of seed was 817 bushels and 21 pounds, the largest yield of oats ever known, and duly verified.

It has come to our knowledge that certain seed houses are sending out as Lincoln Oats, common, ordinary oats, such as can be bought at any FEED STORE. Of this we have POSITIVE INFORMA-TION. As the introducers of this Oat, and having a just pride in

sustaining its reputation, we deem it necessary to caution the public against the imposition thus practiced. The only safe plan is to buy your seed from us, or from those who can show proof of having obtained their seed direct from us.

# NORTHRUP, KING & CO.'S LINCOLN OAT.

We believe the Lincoln Oat to be the best ever introduced. The claims we made for earliness, enormous yielding qualities and freedom from rust when first sending it out, have been fully sustained on every point and from all sections. Hundreds of customers have written us that, on account of its stiff straw, it stood up perfectly under weather that caused all other varieties to lodge. It is the best and most economical Oat for feeding, on account of its thin hull, heavy meat and soft nib.

Price of Lincoln Oats: Per bu. of 32 lbs., 80 cts; 2 bush., \$1.50; 10 bush., \$6.00; 20 bush., \$11.00; 100 bush., \$50.00. Sacks included. Delivered to R. R., Minneapolis.

Why plant unknown varieties or run out of stock, when you can get true stock of Lincoln Oats from the introducer at these low prices.

It is one thing to make extravagant and ridiculous claims for an Oat in sending it out. It is another thing to be able to point to such a record as the Lincoln Oat possesses. Introduced by us in 1893, our sales since then have steadily increased, until last season they were nearly double that of any previous year. Why is this so? Not because of extensive advertising, for we have not for several years expended a dollar in pushing it, outside of the usual mention in our annual catalogue. It is simply for the reason that it has built up for itself such a reputation in every place where it has become known that people will have it, and they come to us for it, because they know that from us they will get the genuine seed.

# NEW ZEALAND RUST PROOF.

This variety was introduced into this country by means of a small package sent some years ago by a traveler in New Zealand to a friend in Iowa. It is a white side oat with medium sized grain, heads are extra long, heavy and full, averaging about 100 grains each, grows taller than ordinary and is medium early, though several days later than the early round head varieties. Its great hardiness and the strength and stiffness of its straw is remarkable. It stools out extra well and requires less seed per acre than most kinds. It does not rust, and, unlike all other varieties of side oats, has never been known to lodge; and, instead of having a tendency to deteriorate it seems to improve each year as it becomes more acclimated. Lb., 20e, by mail, postpaid. By express or freight: Peck, 30e; bu., \$0c; 2 bu., \$1.50; 1) bu., \$6.00; 50 bu., \$25.00. Bags included.

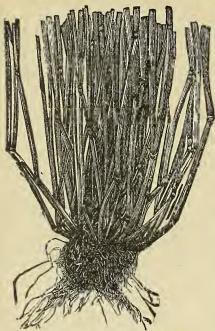

# WHITE RUSSIAN (Improved).

The original stock of White Russian Oats was really a capital Oat, and sprung immediately into great favor. The original stock of white kitssian Oats was really a capital Oat, and spring infinited at the Council of late years it has become badly mixed and deterioated, through not being properly grown. Largely through the efforts of a customer of ours in Dakota, we are able to offer the White Russian in its old time purity. It is a well established fact that the true White Russian is as nearly rust proof as any Oat can well be, and we are confident that many will hall its re-introduction with satisfaction. Lb., 17c, by mail, postpaid. By express or freight: Peck, 25c; bu., 75c; 2 bu., \$1.40; 10 bu., \$5.50; 20 bu., \$10.00. Bags included.

### EARLY ARCHANGEL.

The original stock of this Oat was obtained from Archangel, a hamlet in the north of Russia, and since its introduction to this country has been grown with great success. It has proven itself to be absolutely the earliest Oat yet introduced; it is a heavy yielder, does well on light soil, and is a most satisfactory Oat in all respects. Its principal attraction is its extra carliness; and by this quality it escapes many of the ills which Oats are heir to. The straw is stiff, well glazed and erect. The grain itself is plump, heavy, exceedingly white, and of excellent feeding quality. The seed we offer is of our own growth from the original stock. Lb., 17c, by mail, postpaid. By express or freight: Peck, 30e; bu., 90e; 2 bu., \$1.75; 10 bu., \$7.50. Bagsincluded.

# SEED WHEAT AND SEED BARLEY.

PRICES We are obliged to ask a considerable advance over the market price for our **High Grade Seed Wheat**, as there is a very much larger cost attached to its production and preparation than any one who has not had the experience could possibly appreciate. Space does not permit of going into details, but, as a matter of fact, the prices named below for the larger quantities represent but a slight advance over the actual cash outlay to us.

We believe that farmers who want to change their seed will find it very much to their advantage to secure enough, at least, to give them a start.

To those who do not care for the pedigree, or highly improved stock, but want simply good, healthy, sound and reasonably clean wheat, we would state that, Minneapolis being the largest wheat receiving city in the United States, we are in position at all times to select, from the hundreds of cars which are daily arriving, excellent lots of either Fife or Blue Stem, and which we will sell either in car or less than car lots, at a slight advance over the prevailing mar-ket price. Will be glad to send samples and prices upon application.

SASKATCHEWAN FIFE WHEAT.

Single Root.

Single Root.

Sider this to be the best and purest stock of Fife wheat obtainable. Great pains has been taken in and is perfectly sound and healthy. Lb., 15c, post-post and freedom from smut and disease. This wheat has become so well known as to render extended description of it unnecessary. We first brought it to the attention of the trade in 1884, and it has well sustained the claims then made for it, as the earliest and healthlest Spring Wheat. Lb., 15c, postpaid. By express or freight, peck, 40c; bu., \$1.30; 2 bu., \$2.40; 10 bu., \$10.00; 50 bu., \$45.00. Bags included.

VELVET CHAFF BLUE STEM SPRING WHEAT. A distinct variety from all other spring wheats. The stem, just below the head, when green, has a beautiful blue bloom on it, similar to the bloom on a grape, and which can be removed by passing the finger over the stem. This bloom disappears as the wheat ripens, and the stem and straw assume a beautiful golden yellow hue, and entirely free from rust. Earlier than the Scotch Fife. The kernel is of the hard variety, similar to Scotch Fife, more productive, one of the best spring wheats for milling. Lb., 15c, postpaid. By express or freight, peck, 40c; bu., \$1.35; 2 bu., \$2.50; 10 bu., \$11.00; 50 bu., \$50.00. Bags included.

SEED BARLEY.

SEED BARLEY.

NEW BEARDLESS BARLEY. All Barley growers have experienced the annoyance occasioned by the chafing and sticking of the beards while threshing. This nuisance has been overcome in the New Beardless Barley, which is entirely free from beards. This barley is six-rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth wheat, with the exception of a small duck bill on the point of each grain. This Blue Stem Wheat, comes off readily in threshing, leaving the threshed grain looking like any other white barley.

Lb., 15c, postpaid. By express or freight, peck, 40c; bu., \$1.25; 2 bu., \$2.25; 10 bu., \$9.00. Bags included.

MANSHURY BARLEY. This is the best six-rowed barley we ever grew or ever saw. Lb., 15c, postpaid. By express or freight, peck, 30c; bu., \$1.00; 2 bu., \$1.50; 10 bu., \$7.50. Bags included.

BLACK HULLESS BARLEY. We have sold a good deal of this barley during the last 15 years, and it has given most excellent satisfaction as a feeding barley. We strongly recommend the White Hulless in its place, but as many will be reluctant to believe that anything can be better than the Black Hulless, we still offer it. Lb., 15c, postpaid. By express or freight, peck, 40c; bu., \$1.25; 2 bu., \$2.00; 10 bu., \$8.50. Bags included.

Grain of Highland Chief Barley.

# HIGHLAND CHIEF BARLEY.

HIGHLAND CHIEF BARLEY. (Two-rowed.) We several years ago sent a sample of this barley to the head of the largest firm of Malsters in the United States, who wrote us in acknowledgment that, in "sixty years of experience in the malting business, he had never seen such a handsome sample of Barler." The HIGHLAND CHIEF is a vigorous grower, the size of the grain, when compared with any other, being immense. It is less likely to be damaged by wet than most other kinds, as it is much more closely covered with broad awns or spikelets; consequently it is less liable to lose color by wet weather. It is very productive, and usually weighs quite 50 lbs. to the measured bushel. Large pkt., 10c; lb., 20c, postpaid. By express or freight, peck, 40c; bu., \$1.25; 2 bu., \$2.25; 10 bu., \$10.00. Bags included.

WHITE HULLESS BARLEY. The marvelous new grain. It is Hulless. It is Beardless. It weighs over 60 lbs. to the measured bushel. See Page 10.

# MORTHRUP, KING & CO'S

ITS VALUABLE PROPERTIES.

It is HULLESS.

It is BEARDLESS.

It is EARLY.

It WEIGHS OVER 60 POUNDS TO THE MEASURED BUSHEL.

It YIELDS WELL on POOR LAND.

It YIELDS ENORMOUSLY on GOOD LAND.

It makes BETTER PORK than CORN.

It makes EXCELLENT FLOUR.

The Straw makes GOOD HAY.

It is OF INESTIMABLE VALUE TO EVERY ONE WHO FEEDS STOCK.

The following letter from Mr. D. C. Carpenter will describe this valuable Barley and the uses to which it may be put, while at the same time giving the actual experience of one who has grown it largely:

NORTHRUP, KING & CO.,

Gentlemen: You ask me what I think of the WHITE HULLESS BARLEY. I have grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow

acre, and it is the vest grain to sow for hay that grows. Sowearly and you can cul two crops from the same sowing.

As fattening feed for hogs it has no equal. It makes sweeter MEAT and nicer lard by far than corn. I fattened to hogs for one butcher here with it, and made a gain of 106 lbs. to the hog in five weeks. The butcher said that he never handled such fine pork before.

I have tried feeding it in all ways, and I find the best way is to grind it and feed dry, with clear cold water in another trough for them to drink out of. It grows very quickly and on any kind of soil. You can sow it after all other grain is sowed, and harvest it then before wheat and oats are ready. I have sown it as tate as the 18th of June and made a good grain crop. Stock will eat the straw in preference to "slough" hay. The straw is small, with very It stools wonderfully. Once used for hay for work horses, you heavy leaves. would n't have any other.

For Flour it discounts Buckwheat. We use it all the time for hot cakes.

Yours truly,

D. C. CARPENTER.

For Grain, sow 1½ bushels to the acre. For Hay, 2 bushels. Price, ib., postpaid, 30c; peck, 50c; bu., \$1.75; 2 bu., \$3.00; 10 bu., \$12.50. Bags included. For 10 cents, a sample of this unique and valuable Barley will be sent to those who wish to inspect it before purchasing.

SPECIAL NOTICE. Last year we could hardly begin to fill the orders we received for WHIFE HULLESS BARLEY and were obliged to return money to many who ordered late.

We anticipate an enormous demand for it this season, and as our supply is not large, we arge early orders from those wishing to secure seed.

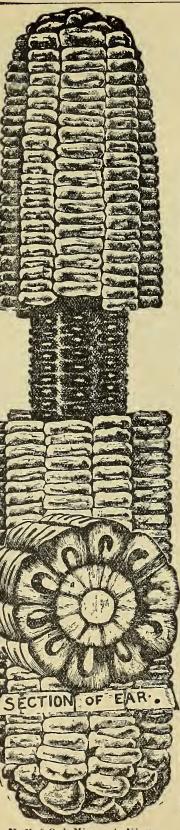

"DISAPPOINTED," "The WHITE HULLESS BARLEY I received from you WAS A DISAPPOINTMENT. I did not expect to raise such nice looking grain as the picture in the Catalogue showed, but it was BETTER

LOOKING THAN THE PICTURE, and SUCH A YIELD.

"The TIMOTHY, ALSIKE and RED CLOVER received from you, I sowed in May without any nurse crop, and about the first of August I cut 1's TONS TO THE ACRE. The MASTODON CARROTS were the LARGEST I about the first of August I cut 1's TONS TO THE ACRE. E. D. GOULD, Antige, Wis." EVER SAW; in fact, all the seeds were JUST RIGHT. Respectfully,

MR. D. C. CARPENTER.

Mr. C. W. Sutton, Hillsboro, N. D., Hillsboro, N. D., Dec. 10, 1897. NORTHRUP, KING & CO., Minneapolis, Minn.

Minneapolis, Minn.

GENTLEMEN After purchasing seeds of you for more than ten years, and finding them always of the best quality, I wish you to know that I recognize and appreciate the great advantages I have reaped in being able to obtain such reliable seeds, I wish particularly to make mention of the MERCER CORN that I first obtained from you about eight years ago and have raised eyer since, greatly to my advantage and satisfaction. Always testing my own corn before planting, I have sometimes found that only a small percentage of it would grow. When I have sent to you for seed, that in every instruce has prince to be reliable. I should like to know your secret in being able to always firmlish seeds that will grow.

Yours truly,
C. W. Sutton.

ERIE. N. D., Dec. 15, 1899.

I was very much pleased with your MER-CER CORN. It was planted on the 20th day of May, and was ripe and fit to harvest the second week in August. It made me a good crop of fine hard corn. Everyone who has seen it in the crib says it is the finest they have ever seen in this country. C. B. WARNER.

Prof. W. M. Hays.

CORN CORN CONSURANCE POLICY NORTHRUP, KING & CO. MINNEAPOLIS MINN.

There is no man owning buildings but who sleeps more soundly at night from knowing that they are INSURED. Farmers who plant our TESTED MINNESOTA GROWN SEED CORN are, to a certain extent, INSURED.

Those are anxions days for the farmer when, with a good crop in sight, he is wondering whether early frosts are not going to catch his corn. Five to ten days in the latter part of the season are very often CRITICAL DAYS.

This anxiety and risk can be

This anxiety and risk can be greatly lossened by planting OUR MINNESOTA GROWN SEED. A VAST AMOUNT OF MONEY would be saved to the country each year if farmers would plant seed grown as FAR NORIH AS POSSIBLE.

As the Originators or Introducers of nearly all the Standard Early Varieties of Seed Corn in use to-day, we consider that we may justly claim to be HEAD-QUARTERS for Northern Grown Seed Corn, that is NORTHERN GROWN.

"The INHERITED QUALITY OF CORN, to YIELD HEAVILY or POORLY, all comes in the TEN POUNDS, MORE OR LESS, OF SEED PLANTED."

Does it pay to plant mix-d, run out Corn from crib when an investment of a few cents an acre will secure selected vigorous stock of your favorite variety?

your favorite variety?

It will be noticed that we list not only early varieties, but all the best late sorts like the Leaming, Champion Pearl, etc., etc., these sorts having been grown as far North as they will ripen thoroughly. We wish to impress on farmers living in Illinois, Nebraska, etc., that by planting our Seed, of LATE sorts, they will be able to secure their crops earlier than could possibly be the case with seed grown farther south.

A RECOMMENDATION. OUR CORN IS TESTED. We do not, however, feel like losing an opportunity of strongly urging our customers, WHEREVER they may purchase their seed, to TEST IT BEFORE PLANTING. It is but little trouble to try a few seeds in earth, and in this way the responsibility can be placed where it belongs.

N., K. & CO'S MINNESOTA KING CORN. (Yellow Half Dent.) We regard this corn (introduced by us in 1889) as the most valuable early corn ever sent out. There are varieties that under exceptionably favorable circumstances will yield as much, but year in and year out, through fat years and lean years, there is, we believe, no sort that will do as well. It seems to possess a faculty of growing right along and making a crop during weather and under conditions that would ruin other varieties. We do not know of any good reason why this should be so, but not only is this our own experience, but we have received like testimony from hundreds to whom we have sold it; the universal expression being that for ability to endure extremes of heat and cold, flood and drought, it has no equal. In appraance the Minnesota King is remarkably distinct, being a half yellow (ent, the kernels are very broad and of an extremely rich golden color. The ear is of good size, eight rowed, cob small. Large pkt., 10c; lb., 20c; 3 lbs., 59°., postpaid. By express or freight, peck, 50c; bu., \$1.50; 2 bu., \$2.75; 10 bu., \$12.50. Bags included.

NOTE. This corn was introduced by us several years ago, and although each season we have anticipated the large sale which it has met by what we considered liberal provisions, we have never as yet been able to supply the demand, having returned money yearly to late purchasers.

"THE BEST CORN IN THIS LOCALITY."
"I am well pleased with the corn and garden seeds received from you. The Minnesota King and Mercer both yielded about no BUSHES FER ACRE. I planted the corn May 20tn. The Mercer was ripe Aug. 23d, Minnesota King, Sept. Ist. I had the best corn I know of in this locality. I have always found your seeds to be good."

JAMES BEATTIE, Howell, Mich.

"From 8 acres planted to your TRIUMPH CORN I raised ELEVEN HUNDRED BASKETS of the greatest corn I ever saw. Some of the ears were 16 inches long, and would average fully Prinches."

ART STRIEFLAND, Glendale, Minn.

REMEMBER that an expenditure of a FEW CENTS extra to the acre for seed, may mean a good many dollars in the HARVEST, and perhaps the saving of the ENTIRE CROP.

# "A NORTH DAKOTA EXPERIENCE."

NORTHRUP, KING & CO., Minneapolis, Minn.

DURBIN, NORTH DAKOTA, Aug. 2d, 1897.

GENTLEMEN: Of the 60 bushels of seed corn, mostly Minnesota King, bought of you for and planted by myself and neighbors, I HAVE NOT HEARD A SINGLE COMPLAINT. This corn was ordered in several different lots at different times. I have talked with those who planted the greater part of it, and all report ENTIRE SATISFACTION. The cold, wet and frosty planting season of 1897 will long be remembered by corn planters, owing to the great and unusual trouble with seed corn throughout the Northwest, and YET YOUR SEED STOOD THE TEST here in the cold Red River Valley of the North, and when that is said nothing further need be said in

I was equally well pleased with all of the other seeds received from you.

L. W. SCOTT.

SQUAW. (Very short crop this year.) Extremely early and of very dwarf habit. We still grow this corn for those who want it, but we urge the planting of our North Dakota White Flint or North Dakota Yellow Flint in its place, as both of these varieties are fully as early, more productive, and make a much more vigorous growth. Large pkt., 10e; lb., 20c, postpaid. Peck, 60e; bu., \$2.00. Bags included.

NORTH DAKOTA WHITE FLINT. Resulting from a careful selection of the Squaw corn for many years. Very much better than the Squaw. Large pkt., 10e; lb., 20c, postpaid. Peck, 60e; bu., \$2.50; 2 bu., \$4.00; 10 bu., \$17.50.

ins places as both of these varieties are fully as early, more productive, and make a much more vigorous growth. A great of the life, 300, Bags included. A great of the Squaw corn for many years with a productive of the Squaw corn for many years with a great of the squaw corn for many years with a great of the squaw corn for many years with a great of the squaw corn for many years with a great of the squaw corn for many years with a great of the squaw corn for many years with great squaw corn for many years with great squaw corn for many years with great squaw corn and not have a great of the squaw corn for the past six years with great squaw cases and complete satisfaction. Were produced, having yielded in the length, 200 the squaw corn for the past six years with great squaw corn and the square production of the past six years with great squares and complete satisfaction. Were productive to the square production of the past six years with great squares and complete satisfaction. Were productive to the square production of the past six years with great squares and complete satisfaction. Were productive to the square production of the past six years with great squares and complete satisfaction. Were productive to the square production of the squares of the squares and complete satisfaction. We great squares and complete

Try our TRIUMPH FLINT CORN. (See page 12.) A true 80 Day Corn.

A PERPLEXED FARMER Is not a race sight, but this condition of mind does not then arise through having such a large crop that he does not knaw how or where to house it. There would be many such cases, however, did all have the same good fortune as that experienced by Mr. Alfred Rose, of Yates County, N. Y., who raised an one acre of Mastodon Corn 15,898 pounds of Corn on the ear, which made 213 bushels of shelled Carn.

PLEASE NOTE .- Mastodon Corn is early as PLEASE NOTE.—Mastodon Corn is early as conspared with Golden Beauty, Leanning and other standard late sons, but we do not as yet reconnend it for general planting north of lathode 43, We have grown it successfully the past two years within a few nules of Minneapolis, and hope In two years more to be able to recommend It for general planting as far north as latitude 45. Meantine, we hope as many of our customers in the North, as possible, will try a packet und report their success. their success.

The originator states: "The Early Mastadon Core, named Mastonon because of its large ears,

Corr., ranged Mastonon because of its large ears, has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been anxiously and, until I got up this corn, was not fully satisfied. Many sorts have been tried and found wanting. In the Mastodon your customers will find a high-bred corn, of beautiful color, and one which will please them. I claim for this corn the largest number of rows on cob, and the deepest, longest grains of any carn ever originated, making the finest appearing shelled corn I ever saw, being a cast of two colors, and such corn as brings the highest price in market. It grows very rapid, strong and rank at a medium height, and will ont-yield any corn ever grown in this section. You cannot too highly recommend this corn to your customers. I have grown thousands of bushels of Golden Beauty, and the Mastodon is from three weeks to one month carlier, growing side by side and planted the same week." Price for Mastodan Corn: Large pkt., 10c: lb., 20c; 5 lbs., 80c, postpaid; by express or freight, peck, 40c; bu., \$1.25; 2 bu., \$2.00; 10 bu., \$3.50. Bags included.

# 2.000 KERNELS ON A SINGLE EAR.

"The Early Mastodon Corn I bought from you last year was the biggest corn I ever had,—some ears with 2,000 kernels on. It is good fodder, too. MARTIN B. MATTSON, Princeton, Minn."

From this it will be seen that Mastodon Corn last year made a large crop farty miles north of Minneapolis, and is good evidence that our efforts to make this corn earlier are bearing fruit. We, however, do not as yet recommend it for general planting north of latitude 43.

IOWA GOLD MINE CORN. Every one who has tried it is enthusiastic in praise of this splendid variety. It is medium early, ripening but a few days later than Pride of the North. Ears are not excessively large, but of good size and symmetrical. Calor, a bright golden yellow, shining like new coin direct from the mint. Grain is very deep, cob small, and therefore dries out very nearly as soon as ripe. To pounds of ear corn makes 60 to 62 pounds of shelled corn, and in hauling to market it weights out 5 brishes more to the wagon load than common varieties, in the same size wagon. To pounds of corn on the ear has given 64 pounds of shelled corn and only 6 pounds of cobs. This is unparalleled and cannot be equalled by any other corn in the world. Large pkt., 10c; lb., 20c; 3 lbs., 50c, postpaid; by express or freight, peck, 40c; ba., \$1.15; 2 bu., \$2.00; 10 bn. or over, at 8.0c.

NORTHRUP, KING & CO.S MINNESOTA LEAMING. (Veliew Bent.) For a number of years we have been working on this well known variety, and we now have it so that it is perfectly safe, under ordinary conditions, to plant it in all sections south of Minneapolis. We have been working on this corn because we believed it to be, for many reasons, the best variety for permanent improvement. It aturally possesses a hardy constitution, the ears are of good size, cobs quitosmall, and the grain exceptionally bright and heavy. We strongly recommend this for general planting. Large pkt., 10c; lb., 20c; 3 lbs., 50c, p stpaid; by express or freight, peck, 40c; bn., \$1.25; 2 bn., \$2.25; 10 bn., \$10; bags included.

GOLDEN BEAUTY. (Vellow Dent.) The largest grain

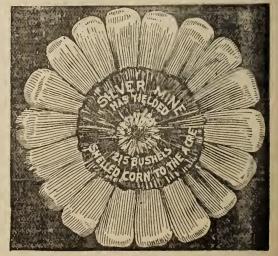

GOLDEN BEAUTY. (Yellow Dent.) The largest grain Yellow Dent Corn in cultivation. The ears are large and of perfect shape; has from ten to fourteen rows and fills out well to the end of the cob. Not recommended for the Korthwest, but for Middle and Southern states.

Korthwest, but for Middle and Southern states.

SILVER MINE CORN. The Great \$1,000 Carn—Yields 215 Bushels per Acre. The most marvelous variety of corn ever offered, and one which will surprise every one who plants it. If the farmers take hold of this as they should it will revolutionize the corn growing of the country. Stalk grows to a height of about seven or eight feet and sets the ears about three and one-half to four feet from the ground. Just the right height for easy picking. It is early, matured last year in less than ninety-five days, and has never been caught by the frost. The cob dries out rapidly, so that it is ready for market very early. It produced 215 bushels per acre in Scott county, ha; 211 bushels in Indiana, 201 bushels in Arkansas, 175 bushels in Illinois, list bushels in Nebraska, 144 bushels in Ohio and 137 bushels in Texas. Average of above is 176 bushels shelled corn per acre. Price, postpaid or by express prepaid: Large pkt., 10c; ib., 20c; 3 lbs., 50c; by freight or express (purchaser paying charges), peck., 40c; bu., \$1.15; 2bu., \$2; 10bu. @ 90c.

"I wish you could see our Ma-todon Corn that we have grown con-tinuously for four years from seed originally purchased from you. En. Brotsinger, McGregor, Ia."

中海路沿海路沿海路沿海

In every section where Live Stock is an important feature of the farm, Fodder Corn is equally important. The BEST Fodder Corn is that

which will give the greatest net amount of good feed from an acre of ground. The varieties we list are all good, each possessing certain distinctive points of excellence which we endeavor to point out in the description. We ask our customers to bear in mind that the comparative value of these varieties depends largely upon the section in which they are to be grown. While all of them can be successfully grown for fodder, in any latitude, some varieties mature ears earlier than do others, and as the advancement in maturity of ears increases the value of the cornfor fodder, this point should be weighed in making a choice. The Giant and Red Cob Fodder Corns will not, as a rule, yield large ears north of latitude 44. The Elephant Fodder and Evergreen Sweet Fodder Corns are earlier than the first named sorts, but do not yield as large a tonnage. If fuller information is desired, we shall be glad to supply it, as far as lies within our power, and will be pleased to make recommendations when desired.

STOCKMEN, DAIRYMEN and others using FODDER CORN should place their orders EARLY, so that they can secure it at the low prices, test it and have corn on hand that they know WILL GROW, when ready

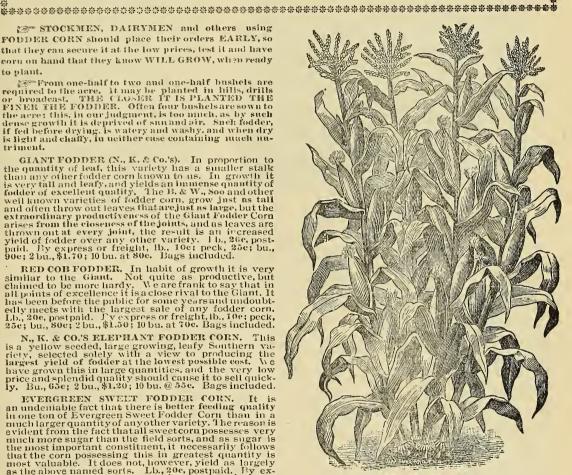

From one-half to two and one-half bushels are required to the acre. It may be planted in hills, drills or broadcast. THE CLOSER IT IS PLANTED THE FINER THE FOODER. Often four bushels are sown to the acre: this, in our judgment, is too much, as by such dense growth it is deprived of surand sir. Such fodder, if fed before drying, is watery and washy, and when dry is light and chaffy, in neither case containing much nutringed. triment.

GIANT FODDER (N., K. & Co.'s). In proportion to the quantity of leaf, this variety has a smaller stalk the quantity of leaf, this variety has a smaller stalk than any other fodder corn known to us. In growth it is very tall and leafy, and yields an immense quantity of fodder of excellent quality. The B. & W., Soo and other well known varieties of fodder corn, grow just as tall and often throw out leaves that are just as large, but the extraordinary productiveness of the Giant Fodder Corn arises from the closeness of the joints, and as leaves are thrown out at every joint, the result is an increased yield of fodder over any other variety. I b., 26c, postpaid. By express or freight, lb., 10c; peck, 25c; bu., 90c; 2 bu., \$1.70; 10 bu. at 80c. Bags included.

RED COB FODDER. In habit of growth it is very similar to the Giant. Not quite as productive, but claimed to be more hardy. We are frank to say that in all points of excellence it is a close rival to the Giant. It has been before the public for some years and undoubtedly meets with the largest sale of any fodder corn. I.b., 20c, postpaid. Ty express or freight, lb., 10e; peck, 25c; bu., 80c; 2 bu., \$1.50; 10 bu. at 70c. Bags included.

N., K. & CO.'S ELEPHANT FODDER CORN. This N., K. & CO.'S ELEPHANT FODDER CORN. This is a yellow seeded, large growing, leafy Sonthern variety, selected solely with a view to producing the largest yield of fodder at the lowest possible cost. We have grown this in large quantities, and the very low price and splendid quality should cause it to sell quickly. Bu., 65e; 2 bu., \$1.20; 10 bu. @ 55c. Bags included.

EVERGREEN SWELT FODDER CORN, It is an undeniable fact that there is better feeding quality in one ton of Evergreen Sweet Fodder Corn than in a much larger quantity of any other variety. The reason is evident from the fact that all sweet corn possesses very much more sugar than the field sorts, and as sugar is the most important constituent, it necessarily follows that the corn possessing this in greatest quantity is most valuable. It does not, however, yield as largely as the above named sorts. Lb., 20e, postpaid. By express or freight, peck, 40e; bn., \$1.40; 2 bu., \$2.50; 10 bu. at \$1.15 per bushel, bags included. EVERGREEN SWEET FODDER CORN. It

FODDER CORN.

.......

pop Corn. In every honsehold where there is a child, particularly on the farm, there ought to be plenty to get out the popper, but after it is out, we have noticed that the elders In every honsehold where there is a child, eat their full share. It is easily grown, occupying but little space in the garden, and any not wanted for home use can be readily sold. We offer the best varieties only.

# DWARF ESSEX RAPE.

We were the first Seed House in America to bring Dwarf Essex Rape preminently forward as a desirable and economical Pasturage for Sheep.

Following Professor Shaw's first bulletin on the subject, written while he was connected with the Canadian Department of Agriculture at Guelph, Ont., we arranged for a quantity of the seed of the True Dwarf Essex Rape with a grower of Essex County, England. Every year since then we have had our seed from the same source. We pay a good price for it. We can buy it for a good deal less elsewhere, but it has always given satisfaction and has stood the test. For this reason we are not able to make always as low a price on Dwarf Essex Rape as some of our competitors, but while many other houses have had trouble with their Rape Seed, ours has always been satisfactory and proven true to name. We are led to make this statement from the fact that many in seeing or sending for our price cannot understand why our prices, so low on most everything, are sometimes higher on Dwarf Essex Rape. A few cents extra peracre may make a GOOD MANY DOLLARS DIFFERENCE IN THE CROP.

DWARF ESSEX RAPE. -"Do They Like it?" From a Photograph taken at the Minnesota State Farm.

DWARF ESSEX RAPE is an annual, bearing a close resemblance in leaf and stalk to the rutabaga, but both leaves and stalk to the rutabaga, but both leaves and stalk are more numerous in the Rape plant, and of a taller habit of growth. It is a pasture plant which may be caten off by any kind of live stock, but it is preminently fitted to furnish pasture for slicep and swine. A good crop will furnish at least 12 tons of green food peracre, and its nutritive value is nearly twice that of clover. One acre of well grown Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market. Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. cellent.

cellent. This plant may be grown successfully in the following ways, viz: 1. In the early spring to provide pasture for sheep and swine. 2. In June or July ou well prepared land to provide pasture for sheep. 3. Along with grain, using 2 lbs. of seed per acre to provide pasture for sheep after harvest. 4. Along with peas, oats, clover seed, to provide pasture for sheep, and to get a "catch" of clover. 5. Along with corn drilled in broadcast, to provide pasture for sheep. 6. In corn, sowing the seed with the last cultivation given to the corn. 7. Along with rye, sown in August, in sheep pasture. When rape is sown broadcast, 5 lbs. of seed per acre will suffice. When sown in rows, say, tis now being

acre will suffi30 inches apart, and cultivated, from 1 to 2 lbs. will be enough. It is now being
grown in the Northern and Middle States from the Atlantic to the Pacific. The
day is not far distant when it will be grown extensively as a pasture for swine in
all the Northwest. Millions of sheep and lambs will be fattened on it in the United
States. Our stock is the true Dwarf Essex, imported by us direct from Essex
County, England. Several other varieties are sold, but they have not proven satisfactory. Price, lb., 25c, postpaid; by exp. or frgt., lb., 15c; 10 lbs. @ 9c; 100 lbs. @ 8c.

SORGHUM. SORGHUM. SORGHUM.

SORGHUM.

EARLY MINNESOTA SUGAR CANE. A much Neglected, a Highly Valuable Plant. Notwithstanding its great adaptability as a food for live stock it is only quite recently that the real value of Sorghum (or sugar cane) has attracted general attention. In the Northwest, its great merit is not at all appreciated, and we wish to call the attention of farmers everywhere to the great value of Sorghum as a pasture and fodder crop, and to the particular advantage to be gained in using our Selected Minnesota grown Seed in place of any other kind. Sorghum may be made to furnish the principal provender for Cattle, Horses and Mules from August until the following spring. As a summer pasture for Sheep, a wide field is likely to be opened up for it. As a soliling food for swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of corn. It grows right along through the severest and nost prolonged droughts, so that a good yield may be expected from suitable soils in any season after the plauts have secured a good start.

AS PASTURE. It is grown with excellent results, and springs up quickly after being fed or cut. Care, however, should be exercised in feeding it green, for while some growers state that no ill results follow its free use, others claim that, like clover, it will produce bloating.

AS FODDER. It beats everything. One correspondent writes us: "For winter feed, the most economical thing we know of. We have taken off 37 full loads about 50 tons) of half-cured fodder to the acre." When fed as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn.

About 50 tons) of hall-cured rodder to the acre." When ted as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn.

About thirty pounds of seed is required to the acre. Use a wheat drill set to one bushel. Stop every other hole. When the plants are about 8 inches high, harrow with a heavy two-horse harrow.

For soiling, it may be cut as needed. For fodder, cut soon after the bloom comes ont on the heads, leave for two or three days on the ground, then put up in shocks of showing head each.

ont on the heads, leave for two or three days on the ground, then put up to shocks of about one load each.

THE SEED. No other variety can, in our estimation, compare with our Improved Early Minnesota, either for sugar or fodder purposes. It is unusually rich in faccharine matter, is vigorous and much earlier than any other variety. Price, per lb., 20c, postpaid; by express or freight, lb., 10c; 10 lbs. @ 6c; 100 lbs. @ 5c; bags included.

included SOUTHERN GROWN CANE SEED. Please bear in mind that our MINNESOTA GROWN AMBER CANE is from two to three weeks earlier than Southern Cane. Where Early Maturing Cane is not particularly desired, Southern Seed may be satisfactorily used. This we offer as follows: Amber Cane. (Southern Grown), lb., 15c, postpaid; by express or freight, lb., 6c; 10 lbs. @ 4c; 100 lbs. @ 3c; 500 lbs. @ 234c.

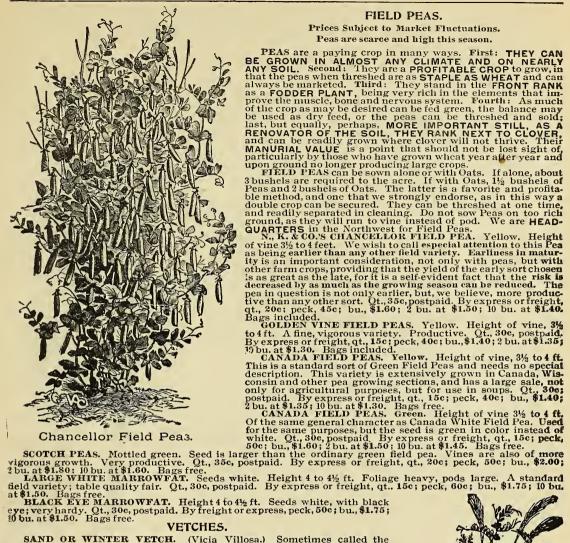

Bags included.

ORANGE CANE. (Southern Grown), lb., 15c, postpaid; by express or freight, lb., 6c; 10 lbs. @ 4c; 100 lbs. @ 3c; 500 lbs. @ 2%, bags included.

Early Minnesota Amber Cabe.

WRITE FOR SPECIAL PRICES ON LARGER QUANTITIES OF RAPE AND SORGHUM.

# FIELD PEAS.

Prices Subject to Market Fluctuations. Peas are scarce and high this season.

PEAS are a paying crop in many ways. First: THEY CAN BE GROWN IN ALMOST ANY CLIMATE AND ON NEARLY ANY SOIL. Second: They are a PROFITABLE CROP to grow, in that the peas when threshed are as STAPLE AS WHEAT and can always be marketed. Third: They stand in the FRONT RANK as a FODDER PLANT, being very rich in the elements that improve the muscle, bone and nervous system. Fourth: As much of the crop as may be desired can be fed green, the balance may be used as dry feed, or the peas can be threshed and sold; last, but equally, perhaps. MORE IMPORTANT STILL, AS A RENOVATOR OF THE SOIL, THEY RANK NEXT TO CLOVER, and can be readily grown where clover will not thrive. Their MANURIAL VALUE is a point that should not be lost sight of, particularly by those who have grown wheat year after year and upon ground no longer producing large crops.

FIELD PEAS can be sown alone or with Oats. If alone, about 3 bushels are required to the acre. If with Oats, 1½ bushels of Peas and 2 bushels of Oats. The latter is a favorite and profitable method, and one that we strongly endorse, as in this way a double crop can be secured. They can be threshed at one time, and readily separated in cleaning. Do not sow Peas on too rich ground, as they will run to vine instead of pod. We are HEAD-QUARTERS in the Northwest for Field Peas.

N., K. & CO.'S CHANCELLOR FIELD PEA. Yellow. Height of vine 3½ to 4 feet. We wish to call especial attention to this Pea as being earlier than any other field variety. Earliness in maturity is an important consideration, not only with peas, but with other farm crops, providing that the yield of the early sort chosen is as great as the late, for it is a self-evident fact that the risk is decreased by as much as the growing season can be reduced. The pea in question is not only earlier, but, we believe, more producive than any other sort. Qt., 35c, postpaid. By express or freight, qt., 20c; peck, 45e; bu., \$1.60; 2 bu. at \$1.50; 10 bu. at \$1.40. Bags included.

GOLDEN VINE FIELD PEAS. Yellow. Height of vine, 3½ to 4

SAND OR WINTER VETCH. (Vicia Villosa.) Sometimes called the Hairy Vetch. This has proven to be the most valuable of all the Vetches. It succeeds well on nearly all soils, and thrives surprisingly on poor light land, and well withstands great extremes of drought, heat and cold. It may be sown either in the spring or fall, usually with Rye. It grows rapidly and is particularly valuable in sections where clover does not thrive. In the North it remains green all winter under the snow, and is invaluable for early pasturing or soiling. It is valuable as a fertilizer, being a great nitrogen gatherer. For hay, cut when commencing to pod. Fifty pounds of seed required to the acre. Large pkt., 5c; lb., 20c, postpaid. By freight, lb., 10c; 10 lbs. at 8c; 50 lbs. at 7c; 100 lbs. at 6c. Bags free.

SPRING VETCHES. Used for the same purposes as the Sand Vetch, but will not thrive on as poor soil, or withstand extremes of weather as successfully. Large pkt., 5c; lb., 18c, postpaid. By freight, lb., 10e; 10 lbs. at 7c; 50 lbs. at 6c; 100 lbs. at 5c. Bags free.

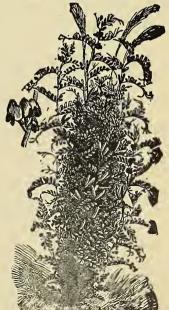

KIDNEY VETCH OR SAND CLOVER. Perennial. Valuable for dry sands and poor soil. Sow 25 lbs. of seed to acre. Pkt., 5c; lb., 25c, postpaid; 100 lbs. at 10c. Bags free.

# The Wonderful Grain from Russia.

Russia has given us Bromus Inermis, the most notable addition to our Russia has given us Bromus Inermis, the most notable addition to our list of grasses in many years. She has come to the front with a grain which is fully demonstrated to be of extraordinary value for growth on poor soils and in drouthy sections. The chaff adheres to the grain when threshed. One south Dakota farmer says: "The Speltz did remarkably well. It is a wonderful "stooler" and robust grower, yielding nearly 60 bushels to the acre." While the grain is of undoubted value for milling purposes, its present use will be confined to feeding, for which purpose it is very superior. Large pkt., 5c; lb., 20c, postpaid; by express or freight, lb., 10c; 3lbs., 25c; peck, 50c; bu., \$1.50.

Your seeds received by me last spring were entirely satisfactory and your "Triumph" Corn in particular was more than I anticipated. It took the prize at the Lincoln County Fair, and there was none other that could even possess its firmness. I have ears to becket long, with 18 rows of corn, which I think can't be beat in this part of the country. If you will favor me susual, with your 19% Catalogue, you can depend on me for an order.

Sand Vetch.

# MISGELLANEOUS FODDER AND FORAGE SEEDS.

If Wanted by Mail, add 10 cents per pound for Postage.

AUSTRALIAN SALT BUSH. The many thousands of acres of alkali lands of the West may be made productive and profitable by planting Salt Bush. Cattle, Horses, Sheep and Swine eat it and thrive on it. This plant is not an experiment, it is a demonstrated SUCCESS. It flourishes where grasses and other forage plants will not grow, and furnishes enormous quantities of nutritive food for stock and remains green all winter. Single plants grown on the worst alkali lands have reached a diameter of 16 feet in one season. It succeeds everywhere, and there seems to be no questien but that it will in time eliminate alkali from the ground, rendering it suitable for other crops. Prof. Tower states that its nutritive strength is nearly equal to that of Alfalfa. Large pkt., 10c; lb., \$1.50.

THOUSAND HEADED KALE. We wish to call attention to Thousand Headed Kale as a valuable pasturage for sheep. The plant attains a height of three to four feet and yields an enormous crop of wholsome and nutritious food. It produces more food to the acre than any other, and sheep especially thrive wonderfully upon it. So far as we know, it has not been used in this country, but we do not hesitate to predict that in a few years it will be as popular as Dwarf Essex Rape. It is in England thoroughly established as a safe and profitable pasturage for sheep. The seed should be drilled in rows 20 to 30 inches apart, and plants thinned out so as to stand about 20 inches apart in the row, or the seed may be broadcasted, using 1½ lbs. to the acre. Large pkt., 10c; ¼ lb., 30e; lb., \$1.00, postpaid.

N., K. & GO.'S AMBER WINTER RYE. Nearly all samples of Rye contain quite a large proportion of withered or shrinken kernels, causing considerable loss when it is ground or marketed. The Amber Rye, to which our attention was called by a Minnesota farmer, is the handsomest Rye we ever saw. Every grain is sound and perfect. Wherever it has been sown it has invariably and largely outyleded the ordinary Rye. Little attention has been given to the improvement of this highly in portant and widely grown grain. Rye growers should seize this opportunity to secure this improved stock at the very reasonable price we attach. We will refund any money our customers pay us for this Rye If they say to us after harvest of their crop that it has not paid for itself several times over. Bu. (56 lbs.), 80e; 10 bu. @ 70e.

SPRING RYE. A carefully selected stock. Purchasers can rely upon our Spring Rye being Spring Rye. We take throughout the winter. Bu. (56 lbs.), \$1.25; 10 bu., \$9.00.

# Brass and Clover Seeds.

# PLAIN TRUTH ABOUT "GRADES."

Northrup, King & Co.'s "Sterling" Grades.

The terms Fancy, Choice, Prime and Fair, by which different grades of Grass and Clover Seeds are usually known

We have adopted the above design as our Trademark, and for the protection of ourselves and our customers, have caused it our customers, have caused it and the word STERLING as ap-plied to Seeds to be registered in the Patent Office at Washington.

have become so much abused by some dealers who apply these terms indiscriminately to any quality of seed, that we have estab-lished a grade of our own, called STERLING. which we intend shall invariably represent the best seed obtainable, both as respects purity and high germination. Any one who buys our STERLING grades may return them at our expense, if upon receipt and examination they are found in any respect unsatisfactory, and money paid for same, both for seed and freight, will be promptly refunded.

Those who buy our Sterling grades are absolutely assured the best seeds money can buy. They are to other grades what cream is to skimmed milk.

CHOICE means bright, clean seed of strong germ-ination, but not considered by us sufficiently perfect in all particulars to go into our Sterling grade.

MR. O. C. CREGG. Superintendent of Minnesota State Farmers' Institute,

NORTHRUP, KING & Co.,

Minneapolis, Minn.

GENTLENEN:—We purchased of you last Spring some of your Grass Seeds, sold under the "Sterling Brand." We made selections of them because we were assured that they were free from foul seeds, and had strong germinating power. Our experience with them verified the recommendation you gave.

One of the dangers which grows out of the sowing of grass seed is that we are liable to get injurious weed seeds in such sowing. We had an experience with some in which we obtained the seed of the ox-eyed daisy, and had to watch very closely in order to exterminate the little start which we then gave to that pest upon our place. The Seedsman who will furnish seeds of good vitality, as well as free from noxious weeds, is a valuable aid to good agriculture. We believe that your house proposes to maintain and further establish that reputation for HIGH GRADE SEEDS that is needed in our Northwest.

I am very truly yours,

O. C. GREGG,

Lynd, Minn.

PRIME is in the main good seed, but contains usually a more or less liberal percentage of sand, seed of other grasses or clovers, weed seeds, blighted seeds, etc. In other words, it represents seed that has not been well cleaned. FAIR, or low grade seed, means worthless seed with which no self-respecting farmer ought to insult his land.

# PRICES.

Prices on Grass Seeds, Clovers, etc., are very fluctuating. Those herein given are based on values the day this is written. So we reserve the right to send seed to the value of the money sent us, according as the market is higher or lower. If large quantities are wanted, it is always best to write for prices. Then there is sure to be no misunderstanding. Unless otherwise stated, our prices include sacks and free delivery to any railroad station is Minneapolis. If any Grass or Clover Seeds are wanted by mail, add 10c per pound for postage.

Please note that we quote both by the 100 LBS. and BUSHEL.

In ordering, always state Grade wanted. 20 lbs., or more, supplied at the 100 lb. rate.

"All the Seeds I had from you have given entire satisfaction, especially the GRASS SEEDS. which are the CL ANEST and BRIGHTEST I have ever seen." -CHAS. WELCOME, Pratt, Wis.

### CLOVERS.

WARNING.—It has developed that, owing to short yields of clover seed in the United States, and the great demand that has come from Europe (owing to the almost total failure of the crop there), many American dealers in clover seed have been "SKINNING" their seed; that is to say, running it over screens to take out the large, fine seed to ship to Europe (where they demand the finest grades), leaving the small, half matured and foul seeds to market here.

Regardless of seaveity or price, we HOLD and ALWAYS WILL HOLD our STERLING Grade at the highest level. No seed will go out under that name that is not of ABSOLUTELY KNOWN QUALITY. There are times when we cannot supply our STERLING Grade of some varieties, and at such times we always so inform our customers and promptly return the money. We were obliged to do this in a number of cases last year.

LOOK OUT, too, for SOUTHERN clover seed, which contains BUCKHORN, one of the most vicious of weeds, twin brother to Mustard and Quaek Grass, and fully as objectionable.

MR. J. E. STORY.

New Brighton, Minn.,
Nov. 1st, 1897.
Northrup, King & Co.,
Minneapolis, Minn.
Gentlemen: The Seeds I have had from you while manager of Mr. J. J. Hill's North Oaks Farm, have been most satisfactory.
I wish to highly commend your Sterling Grades of Grass and Clover Seeds, of which we used a large quantity. Farmers could well afford to pay three times as nuch for seeds as pure, as clean, as strong growing as these, than to take the ordinary grades as a yift.
I wish also to speak of your Minnesota King Corn. It is a grand variety, early, a heavy yielder and an excellent sitage sort.

Yours very truly, J. E. STORY.

Mr. Story has a great record as a farmer. As a young man, he won the Gold Medal, awarded by the Counties of Lannark and Carlton, for the best farm in these Counties. He was then made Superintendent of the Government Experiment Station of Ontario, Canada; from there, went as manager of the celebrated "Bow Park" farm, the "crack" farm of Canada, which posi-tion he held until he came to Minnesota to take charge of Mr. J. J. Hill's farm at White Bear Lake.

Bear in mind that values on grass and cloves seeds fluctuate greatly, and that prices mentioned here are those prevailing at the time this catalogue goes to press. It is always best to write for prices. If wanted by mail, add 10 cents a pound for postage. In ordering, always state Grade wanted. 20 lbs. or more supplied at the 100 lb. rate.

# PRICES SUBJECT TO MARKET CHANGES.

The name by which we have desig-The name by which we have designated this Millet has been applied to emphasize the use to which it is now being largely put, as an economical and highly valuable food for stock, especially Hogs; and while it is one of the best varieties to grow on account of the ready salo with which the seed now meets in most millet markets, for Bird Seed and other commercial purposes, if Seed and other commercial purposes, it Seed and other commercial in the standpoint of its merits in raising and fattening swine that we give it prominence and arge its use. While it prominence and arge its use. While recommending for all sections, its highest comparative value will, of course, be

Lb. 100 lba 55c \$45.00 18 12.00 16 12.00 18 12.00 40 28.00

found in those areas whereearn cannot be safely or chearly grown. In such localities HOG MILLET satisfactorily solves the problem as to the profitable raising of swine. Lb., 20e, postpaid; peck, 35c; bu., \$1.00; 10

bu. at 90c.

SIBERIAN MILLET. A new variety from Russia. Earlier than either German Millet, Common Millet or Hungarian, and consequently very valuable for the North; yields remarkably. The Brookings (S. D.) Agricultural Experiment Station pronounces it "the most promising variety yet tested." The dant stools to a remarkable degree, and is not subject to rust. Peck, 50c; bu., \$1,25:

plant stools to a remarkable degree, and is not subject to rust. Peck, 50e; bu., \$1.25: 10 bu. at \$1.00.

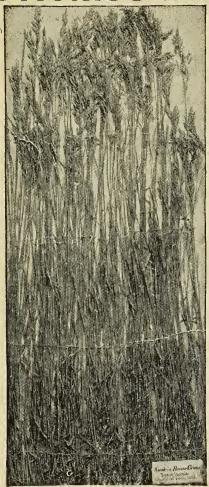

EARLY FORTUNE MILLET. A most promising new variety, of which astonishing yields are reported. Claimed to be rust proof, and that chinch bugs will not eat the plant. Peck, 50e; bu., \$1.25: 10 bu. at \$1.00.

GERMAN MILLET. Those who grow Millet for hay will find the Southern grown German Millet the best variety for that purpose, on account of its giving a ranker yel finer growth than the Northern grown Millets. Peck, 35e; bu., \$1.15; 10 bn. @ \$1.00.

COMMON MILLET. Requires a dry, light, rich soil, and grows 2½ to 4 feet high with a fine bille of stalks and leaves, and is excellent for forage. For hay, sow broadcast, one-half bushel per acre, from May 1st to Aug. 1st. For grain, sow in drills, one peck to the acre, and not later than June 20th. Peck, 30e; bu., \$0e; 10 bn. @ 55e.

HUNGARIAN. A dark seeded variety, resembling in growth the German Millet, but being less rak, and possessing finer stalks. Peck, 35e; bn., \$1.00; 10 bn. @ 90e.

# BROMUS INERMIS DROUTH DEFYING FROST RESISTING

BROMUS INERMIS.

The great Drouth Defping, Frost Resisting Grass. Yields enormous crops of splendid hap, and affords rich, abundant pasturage. Our "Ster= ling" Grade of this magnificent grass is unequalled for purity and high germination, and less seed of it is required to the acre than of any other grade.

# BROMUS INERMIS.

So extensively and favorably has Bromus Inermis been mentioned by the agricultural press, and so unanimous in its praise have been all those who have tried it, that extended description seems unnecessary. For the benefit, however, of those whose attention has not been particularly drawn to its merits, we would say that it comes from Russia.

On the great prairies of that country this marvelous grass thrives luxuriantly. It stands year after year in good soil, yielding enormous crops of excellent hay, and furnishes rich and abundant pasturage.

Bromus Inermis is an inestimable boon to countries where clover does not thrive, and where timothy and other grasses, either tame or wild, yield a light and decreasing crop of hay. It is a thoroughly established success in North and South Dakota, Montana, Washington, Colorado, Wyoming, Idaho and other States, and its introduction into those States means millions of money added to their wealth. So far North as Manitoba it has proven an unequalled success. Mr. S. W. BEDFORD, Superintendent of the Experimental Farm at Brandon, Manitoba, writes us under date of Nov. 9, 1899:

"The Bromus Inermis has done exceedingly well on the farm

"The Bromus Inermis has done exceedingly well on the farm here, both on high and low land. Even on our gravelly soil and the tops of hills it has given us a fair return, while on the rich, alluvial soil it has yielded us a very heavy crop indeed, exceeding four tons of dry hay to the acre during the past year. It gives us a very much larger return than timothy, and the cattle prefer it above any hay we have tested here. We have tested its feeding value, both to dairy cattle and for feeding steers, and find that it gives us much better results than any other class of hay."

Mr. L. R. CASEY, of the Carrington & Casey Land Co., James town, N. D., in writing us Nov. 6, 1899, states:

"Our use of Bromus Inermis has been for pasturage, and for that purpose have found it excellent. It is green much earlier in the spring than prairie grass, and a month later in the fall. Cattle seek it at any time in preference to the natural grasses. I have every confidence that it is of value for this State, and will before long be depended on for hay as well as pasturage."

Mr. J. H. SHEPPERD, Professor of Agriculture N. D. Agricultura! College, Fargo, writes us Nov. 15, 1899:

"As pasturage it is preferred to timothy by the cattle, as shown by a trial, where it was fed off more closely than timothy in the same pasture. It has the advantage of being early and being green until iate in the fall. The fact that the Bromus Inermis resists drouth better than other cultivated grasses, greatly adds to its value in the Northwest. The eagerness with which it is sought by stock leads me to believe that it is of as much value as timothy for hay and pasturage, and that the hay is as valuable, ton for ton."

Mr. W. J. SPILLMAN, Professor of Agriculture of the Washington Agricultural Experiment Station, on the date of Nov. 7, 1899, writes us:

Agricultural experiment Station, on the date of Nov. 7, 1899, writes us:
"We have had five years' experience with Bromus Inermis. We
find this grass to be well adapted to the wheat soil of this section of
the country. When sown in early spring it makes considerable pasturage in the fall, and a large yield of hay the second season, provided it is not pastured too closely the first season. As to the character of
hay, I regard it as about equal to timothy for horses, and fully as
good as timothy for cattle. We have secured a large amount of pasturage the present summer from a field five years old."

W. M. HAYS, Professor of Agriculture, Minnesota Agricultural Experimental Station, writes us Nov. 8, 1899:

"We have had a great many reports from persons who have tried this grass, and the consensus of opinion is that we have in Bro-mus Inermis a most valuable addition to our agricultural plants."

# PRICES. We offer three grades of Bromus Inermis. 25 lbs. at the 100 lb. rate. WRITE FOR PRICES ON LARGE QUANTITIES.

Our "STERLING" grade is the finest possible quality. Our collector writes us from Germany: "In this you have the pick of this year's crop." It is the best, purest, heaviest and strongest growing Bromus we have ever seen. Only 15 lbs. of this grade required to the acre. By mail, postpaid, lb., 35c; by express or freight, lb., 25c; 100 lbs., \$17.50. Bags included.

CHOICE is pure seed but lighter in weight, and does not shew as high germination. Lb., 30c; by express or freight, lb., 20c; 100 lbs., \$15.50. Bags included. (20 lbs. required to acre.)

PRIME is of good germination and weight, but mixed with seed of cheaper grasses. This is the grade handled by many seed houses, but in the end does not give satisfaction. By mail, postpaid, lb., 25c; by express or freight, lb., 15c; 100 lbs., \$12.00. Bags included.

# BROMUS ERECTUS. FOR SANDY SOILS.

This year we for the first time introduce into America seed of this wonderful grass, which resembles Bromus Inermis in character, but, unlike Bromus Inermis, is suited for poor, light soils. It resists any amount of burning heat, disappearing where permanent moisture of the soil is a feature. Shade will also kill it off, while frost does not affect it. Dr. Stebler, of the Experimental Station of Zurich, Switzerland, says: "For poor soil it is truly a blessing." Vilmorin, the noted agriculturist of France, states "That he owns lands that he put to this grass twenty years ago, and, although the lands have never been manured, the grass still stands extremely well."

While no grass can be recommended for sandy soils of hopelessly drifting character, Bromus Erectus thrives extremely well on soil so poor that other grasses cannot exist. On poor thin soils it is extremely hardy, and remains for an indefinite period, affording large yields of hay (as high as 4½ tons to the acre are reported) and excelent pasturage. 20 lbs. of seed required to the acre. By mail, postpaid, lb., 35c; by express or freight, lb., 25c; 100 lbs., \$20.00. Bags included.

# NORTHRUP, KING & CO.'S CLOVER GRASS MIXTURES.

For Meadows and Permanent Pastures. 

All authorities agree that, for **Pasture** and **Hay**, best results are obtained from the use of grass seeds in mixture. The reasons are obvious: First—A number of species will insure a much denser growth than the same number of seeds of one or two species, and prove Less Exhausting to the soil, since they live to a large extent on different constituents. Second—Seasons that affect some grasses adversely are favorable to other sorts. So that with mixtures a failure is practically impossible, provided, of course, the seed is good. We take great pains in selecting grass seeds, in order to secure the highest germination, and our mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

"The Best I Have Seen."

The permanent pasture mixtures you made up last mixture you made up for Spring for forty acres of our Renville County farm made an excellent catch, and is very thick on the ground. Although the original cost is greater, I believe that such mixtures as these are, in the long run, VERY MUCH MORE ECO-NOMICAL and PROFITABLE than the VARIETIES ORDI-NARILY USED FOR PASTURES in the Northwest.

Treas. H. Poehler Co., Grain Commission Merchants, Minneapolis.

Treas. mixtures you made up last mixture you made up for Spring for forty acres of our Mr. Peavey's Highcroft Renville County farm made an Farm has done splendidly. excellent catch, and is very It was a fine mixture and thick on the ground. Although made a good catch. SPECIAL NOTICE! We ask purchasers to observe that we are able to offer, at these very low figures, only from the fact that we make up large quantities before the commencement of the season, therefore nothing can be taken out. We cannot afford to add anything to the mixture, on account of the slight margin upon which we have figured. We shall be happy, however, to make estimates on any special mixtures desired by our patrons. Our recommendations for quantity to the acre is fixed on the basis of good, fair seeding. The quantity can, of course, be spread over more or less ground, as the case may demand.

# FOR PERMANENT MEADOWS.

| No. 1. For dry and high grounds, light soils  No. 2. For dry and high grounds, strong soils  No. 3. For moist grounds and rich soils  No. 4. For moist grounds, occasionally overflowed  No. 5. # Vegetable Seeds.

In making up our list of Vegetables it is our aim to include those only which possess REAL MERIT, and to describe and illustrate them TRUTHFULLY. Attention, too, is called to the fact that in leading sorts we mention the Number of Seeds to be found in our packets. Bear in mind, please, that our Seeds are TESTED AS TO GERMINATION before we send them out.

# TWO WONDERFUL WHITE FIELD BEANS.

This engraving is from a photograph taken by ourselves of a vine of the CALIFORNIA WORDER, or IMPROVED TREE BEAN, sent us by Emma Stone, of Mora, Minn., which bore 158 pods, and which shelled out 864 beans, the product of a SINGLE BEAN.

"ONE STORY GOOD ONLY UNTIL ANOTHER IS TOLD." "Your CALIFORNIA WONDER Bean is the GREATEST YIELDER I HAVE EVER SEEN. I notice that Emma Stone grew 861 Beans from one sin-gle vine. I have just shelled the Beans from ONE STALK and have 9 Beans. L. R. CROCKER, Minnesota."

"ANOTHER COUNTY HEARD FROM."

"Yonr CALIFORNIA WONDER Bean YIELDED ENORMOUSLY. I have 80c; bu., \$3.25; 10 bu. @ \$3.00.

Solution of the beat stalks and counted the beans on them. One gave 1,168, the second 962 and the third 874, in 13,024 matnred beans from ONLY THREE BEANS PLANTED. This, I think, will pretty nearly beat them all.

L. O. MOLIN, Lewis Lake, Minn."

NEXT." This space is reserved for a story that will bent Mr. Moliu's.

# EARLY ARISTOOK FIELD BEAN.

Several years ago one of our customers, a farmer in Aristook, Maine, sent us samples of a Bean, saying that

they were the EARLIEST white Bean grown, and that on that account, as well as their quality and productiveness, they were in great favor with Bean growers in that locality.

We tested them alongside of every other field sort, and found them not only the earliest by a good many days, but one of the greatest yielders we ever saw. They will certainly mature where no other variety will make a crop.

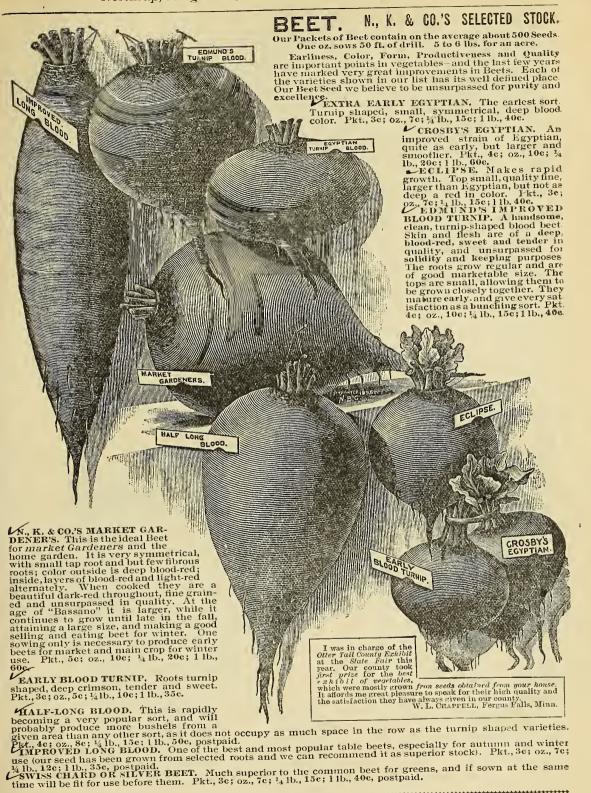

F. E. McKinney, of Northern Minnesota, writes:

"Yon have a great thing in this bean. I have been a boan grower for twenty years, and know what I am talking about. It was just sixty-two days from the time I planted the seed until I pulled them. It is a good bean anywhere and for anybody, but where extreme earliness is desired it is the most valuable bean I ever sue."

They are pure white, medium size. Large pkt., 10c; qt., 50c; peck, \$1.00; bu., \$3.00. Bags included. NOTE.—Not only are the Aristook Beans of great value where the seasons are short, but they should be grown everywhere. All experienced Bean growers know that failure of the Bean crop is more often due to dry weather late in the season than to any other cause. The Aristook Beans are ripe and ready to pull about the time other sorts are thinking about filling.

THE CALIFORNIA WONDER, or IMPROVED TREE, is easily the heaviest yielding Bean known. It is a field variety. The seed resembles the well known "Navy," and, on account of its whiteness and small size, commands the highest price in all markets. It has the additional merit of being pure stock. It is to us a source of constant wonder that Bean growers, otherwise intelligent, should plant mixed seed, as mixed stock always sells at from 25 to 50 per cent, less than straight stock. A few cents extra expended on the seed means many dollars in the crop. 12 quartsof the California Wonder Bean will plant an acre. Price, large pkt., 10c; qt., 40e, postpaid. By express or freight, qt., 20e; peck, 80e; bu., \$3.25; 10 bu. @ \$3.00. THE CALIFORNIA WONDER, or IMPROVED

FOR MANGEL WURZEL (STOCK FEEDING BEET), SEE PAGE 6.

# WASHINGTON WAKEFIELD CABBAGE.

'First in Headl First In Marketl Plest in the Hearts of Gardeners."

(EARLY.) We introduced this Cabbage in 18%, at which time our stock was limited. We received so many letters of praise and congratulation regarding it, that it seemed as

gratulation regarding it, that it seemed as though every one who tried it must have written to make known their satisfaction. All Gardeners are so familiar with the Wakefield Cabbages that description is unnecessary. The engraving shows the character of the Washington Wakefield, and it is perhaps sufficient to say that it leads all other strains of this popular variety in Earliness, Size of Head and Purity of Stock. Large pkt., 15c; oz., 40c; ½ 1b., \$1.25; lb., \$4.00. \$4.00.

in 1897 Angus McDowell, of Wansaukee, Wis., wrote us: "Your Washington Wakefield beats anything I ever saw in the cabbage tine. I sold some sixty-five days after planting the seed. The heads averaged 44 lbs. each, and this with very little care. It will hereafter be my early and principal cabbage." In 1898 he writes: Your Washington Wakefield and Harvest Home are the two best cabbages that grow. The Washington Wakefield was two weeks earlier than the Lightning or Express, and heads as hard as the late sorts."

"Ont of 972 plants of the Harvest Home that I set out from a single packet of seed, not one plant failed to head."
"Any gardener giving your seeds a trial will surply order of you again."

"Any gardener giving your seeds a trial will surely order of you again.

"Your Washington Wakefield Cabbage is the surest header, and has the largest heads of any early cabbage fever handled. Your Model Cauliflower surpasses everything I have ever had."

(Signed.) HENRY JOHNSTON, Monarch, Mont.

"I want to let you know that the Washington Wakefield Cabbage surpassed any other variety of Early Cabbage we had here. We took the first to market July 15th. Receive my most sincere respects in promising you my full order for seeds next year."

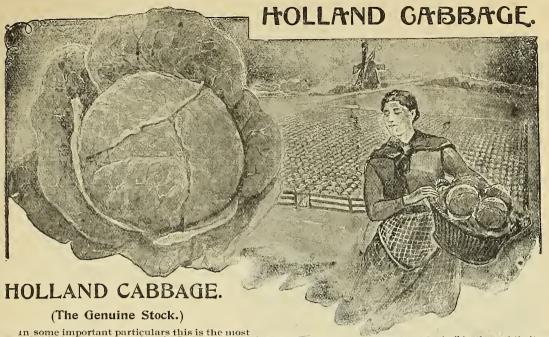

JOHN ABLE, Schofield, Wis.

<sup>&</sup>quot;Your Washington Wakefield Cabbage is the best I ever raised."-T. C. JOHNSON, Holcomb, Neb.

<sup>&</sup>quot;Your Washington Wakefield Cabbage is the ONLY KIND that has proven a perfect success with us."

MRS. D. M. PADDOCK, Hogan, Montana.

In some important particulars this is the most remarkable Cabbage yet produced. In fact, it well illustrates the truth that "merit will win," in that while it was introduced only about four years ago, it has already become the favorite sort with those who have had the true stock. The heads, which are very solid and deep, are of medium size, averaging about 8 lbs. in weight; in color, they are entirely distinct; in point of quality they have no superior, and they keep better than any other sort, the heads being as solid and perfect when taken up in the spring as when put away in the fall. At that time no cabbage will sell beside them even at one-half the price. Large pkt., 5c; oz., 30c; ½ lb., 85c; lb., \$3.00.

We import our Holland or Danish Ball Head cabbage direct from the best grower in Denmark.

Mr. B. L. Grant, of Hudson, Wis., writes: I am very pleased with your stock of Holland Cabbage. The seed for eight acres, was from you; that for four acres was from another firm. Yours was splendid. The Cabbage on the other four acres was not good and they rotted very badly. I regard the Holland as the coming Cabbage. Shall plant twenty acres of it next year, and shall want your seed exclusively. In the past twelve years I find I have bought from your house over 3,000 lbs, of Onion Seed, large quantities of Cabbage and other seeds, and they have always proven uniformly good, both as respects purity of stock and strong germination.

\* THE LUPTON. Considered by Mr. Lupton, the well known cabbage specialist, to embody all the points to be desired in a late cabbage. It is a selection from Excelsior Flat Dutch, and a little earlier. Color dark bluish green. Stem short and strong, heads large, but not coarse. An excellent keeper. Pkt., 5c; oz., 25c; ¼1b., 75c; lb., \$2.25. BRIDGEPORT DRUMHEAD. Late, large head, very solid, good shipper. Pkt., 5c; oz., 20c; ¼ lb., 50c; lb., \$1.50.

LOUISVILLE DRUMHEAD. Popular in the South. Pkt., 5c; oz., 20c; 14 lb., 50c; lb., \$1.50.

Reliable American Grown Cabbage Seed.—It is what every one wants and what every one GETS who bnys seed from us. Market Gardeners and other large planters in the habit of paying Fancy Prices will save Money in the seed and make it in the crop by using our stocks. Northrup, King & Co.'s Selected Late Flat Dutch. A low growing variety, heads large, bluish green, round, solid, broad and flat on the top; an excellent fall and winter variety, and a good keeper. It is a sure header. Our stock has been grown from carefully selected heads, and we consider it superior to any other strain of Flat Dutch Cabbage on the market. Large pkt, 5e; oz., 15c; ¼ lb., 50e; lb., \$1.50. Northrup, King & Co., Minneapolis, Minn. Your seeds have my highest endorsement. The Washington Wakefield Cabbage is the surest header of any large Cabbage I have ever tried in this State. I have always made it a special object to raise a good garden, and from childhood up I have worked in the garden more or less. I believe that most of my neighbors use your seeds, or have this season. If you wish to refer to anyone here you can use my name. This ranch is noted all over for its always good garden. ELMER E. CRAWFORD, Mgr. Bloomington Land & Live Stock Co., Shawmut, Mont.

Northrup, King & Co.'s Selected (late) Flat Dutch Cabbage. (Private Stock.)

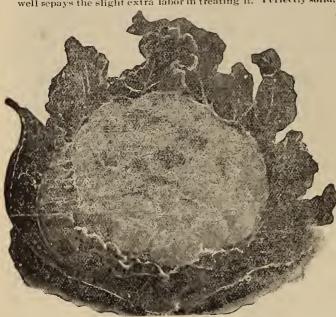

Your Washington Wakefield Cabbage is the best I ever raised. T. C. JOHNSON, Holcomb, Neb.

Your Washington Wakefield Cabbage has all the merits you claim for it. None suits us for early use except Washington Wakefield. It makes heads, and good ones, with such a small amount of rain. MRS. ELLA BLUME, Lindell, Kan.

# CELERY, ETC.

Our Packets of Celery contain on the average about 6,000 SEEDS.—One Oz. of Seed will produce about 3,000 Plants. Large pkt. Oz. 14lb. Lb.

KALAMAZOO. Named and introduced by us in 1888, and we have never seen a better Celery since that time, when we sent it out as the best celery grown. Not a self-blanching variety, but well repays the slight extra labor in treating it. Perfectly solid, beautiful cream color, Crisp

Large pkt. Oz. 41b. Lb. CORN SALAD or Fettieus. Large Round .40 ..... 5e 10c 20c CRESS. Curled or Pepper .....

TRUE WATER CRESS CAULIFLOWER.

One Ounce of Seed will produce 1,000 Plants.

One Ounce of Seed will produce 1,000 Plants.

NORTHRUP, KING & CO.'S MODEL. Several years ago we received from Denmark a sample of eauliflower; the letter accompanying it elaimed it to be a superior strain. We planted this in our trial grounds, and after comparing it earefully with all other early varieties, we concluded that it was fairly entitled to be called the best cauliflower on the grounds. The very earliest sort, while in solidity of head and purity of color we have never seen its equal. It is the best for early planting; best also tor late planting on account of its close growing habit, which allows many more plants to be grown on a given area than of the late spreading sorts. Pkf., 20e; ½ 0c., \$1.25; 0c., \$2.00; ½ lb., \$7.00; lb., \$25.00. Try the Model Cauliflower.

"Your Model Caudiflower is the best in the world, and I had seed from several firms. I had Cabbaye and Caudiflower in market before any one else, and that is saying a good deal."—WILLARD GOOD, Sundance, Wyo.

HENDERSON'S SNOWBALL. Excellent for both early and late planting. Grown from stock seed obtained from originators. Pkt., 15e; 1,40z., 60e; 190z., \$1.00; 0z., \$1.75; 1,4b., \$6.00; lb., \$20.00.

EXTRA EARLY DWARF ERFURT. Short stem, very fine stock. Pkt., 15c; ½ oz., 75c; oz., \$1.25; ½ lb., \$5.00; lb., \$15.00.

EARLY ERFURT. Pkt., 10c; oz., \$1.00; lb., \$7.00.

WALCHEREN. Very late and hardy. Pkt., 10e; oz., 35e; 1/4 lb., \$1.00.

AUTUMN GIANT. Large, late. Pkt., 10c; oz., 35c; ¼ lb., \$1.00.

Report of Cauliflower test from Mich-Igan Agricultural College:-"MODEL CAULIFLOWIR the best of 12 varieties grown. Heads were large, compact and glistening white. Ripens before Early Dwarf Erfurt,"

# CARROTS 'NORTHRUP, KING & CO'S, EXHIBITION STOCKS, IDEAL IN SHAPE & COLOR

# FOR STOCK FEEDING CARROTS, SEE PAGE 7.

Our MASTODON (white) and VICTORIA (yellow) lead all other varieties. They are of IDEAL SHAPE, EASILY LIFTED FROM THE GROUND, FINE IN QUALITY and ENORMOUSLY PRODUCTIVE.

# NORTHRUP, KING & CO.'S "PEEP OF DAY."

Ten Days Earlier than any other Sweet Corn.

This remarkable variety, which we have named "PEEP OF DAY," has hitherto been controlled by two "PEEP OF DAY," has hitherto been controlled by two Minneapolis market gardeners, who, on account of being able to bring it to market from one to two weeks before any other variety was ready, have been able to realize double and treble the price received later for Cory, First of All, Early Minnesota, or any of the other sorts hitherto considered to be the earliest. For the reason that they were making so much ont of this variety, they have hitherto steadfastly refused to part with a single kernel of the seed. We felt, however, that we must have this corn for our customers, and "as every corn has its price," we finally secured the stock. "PEEP OF DAY" corn, in addition to its sensational earliness, is entirely distinct in appearance and habit of growth. The stalk grows from three to four feet in height. The ears average about 5 inches in length, and are of perfect sweet and tender.

An important fact to bear in mind is, that our claim for earliness is not based solely on "trial ground" observation, but on the actual, practical marketing of the crop in a large market for several seasons past.

PRICES. Our stock of "PEEP OF DAY" corn is as yet so limited that we cannot this year offer larger quantities than two quarts to any single purchaser. By mail than two quarts to any single purchaser. By mail by express or freight, pint, 10c; ot., 60c; 2 qts., \$1.00.

Market and private gardeners planting this variety will be sure of having the first sweet corn on the market. They can also realize large returns on their investment by selling to their

neighbors any surplus seed they may be able to save and are disposed to part with.

Everyone Welcomes the FIRST SWEET CORN OF THE SEASON, and there is a natural strife among gardeners to realize the excellent price that the earliest corn of good quality invariably brings.

Market Gardeners and Private Planters will do well to consider

that our Northern Grown Seed will give them earlier corn than will seed of the same varieties grown farther south. Our Seed Corn is thoroughly tested before it leaves our hands.

NOTE.—We are frequently asked what varieties should be planted in order to secure a succession of sweet corn throughout the season. To all who are in doubt, and those already satisfied, let us say: Plant "Peep of Day" for earliest; Portland for medium, and N., K. & Co.'s Zig Zag for late, and secure the very best sweet corn in each class.

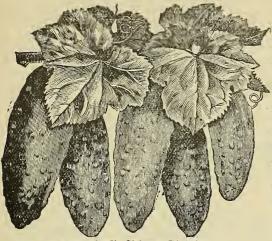

### SWEET CORN.

One quart will plant 200 Hills; 8 to 10 quarts for an acre in Hills. OUR PACKETS contain on the average about 150 Seeds. Please bear in mind that our quart prices INCLUDE POSTAGE. Pints supplied at quart, Pecks at bushel prices. DEDUCT 5 cts. a pint, 10 cts. a quart, if sent by express or freight.

ENDIVE. Green Curled. The standard sort for fall and winter crop.... 5 20 40 1.35 GARLIC. The Garlic is the most pungent in taste and las the strongest odor of all the onion family. It is largely used in the south of Europe, where it is esteemed for flavoring soups, stews, ctc. The root or bulb is composed of many small bulbs, called "cloves," which are planted in the spring. Bulbs, per lb., 30c, postpaid. Write for special price on quantity quantity.

for green-house forcing.

# N., K. & CO.'S "Sterling" Lettuce.

(SOLD ONLY IN SEALED PACKAGES.)

This grand new Lettuce will delight all who growit. It is equally suited for the market gardener or the private planter. The market gardener will find that this Lettnee will command a premium everyther.

# Lettuce.—Standard List.

OUR Packets of Lettuce contain on the average about 2,500 SEEDS.

We pay particular attention to LETTUCE, and supply some of the most critical market garden trade of the United States.

Lettuce, especially the forcing sorts, require particular care, and on this account, perhaps, it has become something of a trade custom to charge fancy prices for it. We are satisfied with the same reasonable profit on our lettuce seed as on other seeds, and our prices will be found very much in favor of the purchaser. SO WILL OUR STOCKS. (W.S. stands for white seeded sorts; B. S. for black seeded.)

# Morthrup's Vellow Meated Japan Musk Melon.

This is the best Yellow Meated Canteloupe. Before we say anything more about it, let us tell you of the plan we follow in in-troducing a new sort: I. We test it carefully by the side

We testit carefully by the side of other varieties of the same class; if it proves satisfactory WE THINK it is a good thing. We place seed in the hands of experienced gardeners, who expose the product for sale in the even worket side by side expose the product for sale in the open market, side by side with the most popular and best selling sorts. If it supersedes these, then WE KNOW it is a good thing.

We then offer it to our cus-

tomers.
Now, is it not better to put a new variety to a practical test of that kind than to merely "think" ti is a good thing, and let our customers find out whether it is or not? Perhaps that is why so many new varieties which go out every year with a flourish of trumpets are never heard from again. Perhaps, also, the plan on which we work has something to do with the fact that the va-rieties we send out become standard and increase in popularity

each succeeding season.

Northrup's Yellow Meated

Musk Melon has become vastly

Musk Melon has become vastly popular and commands the highest price on the market of any of the Yellow Meated sorts. First—Because of its sweetness, remarkable thickness of flesh and pleasant aroma. Second—Because of its earliness and large size. It is unequalled for gardeners, and in the market it simply eaptures the trade. Large pkts., 10c; oz., 20c; ¼1b., 60c; lb., \$2.00, postpaid.

#### .....MUSK MELON.....

OUR PACKETS OF MUSK MELON CONTAIN ON THE AVERAGE ABOUT 250 SEEDS.

以lb. Lb. EARLY NETTED GEM. Very early, small, coarsely EARLY NETTED GEM. Very early, small, coarsely netted, green flesh, fine flavor.

EXTRA EARLY HACKENSACK. Very popular in some markets. Heavily ribbed, coarsely netted.

BALTIMORE, or ACME. Fruit medium size, oval, method, flesh bills green approximation. 20c 60e netted; flesh thick, green, sweet...

COSMOPOLITAN. Fruit oval, light green, netted; flesh green, sweet and highly flavored...

MONTREAL. Fruitvery large, spherical; flesh light 20 20 60 MONTREAL. Fruitvery large, spherical; flesh light green, juicy and sweet.

3AGE, or IMPROVED MILLER'S CREAM. Medium sized, dark green in color; flesh deep salmon color, very thick and of splendid flavor.

3HUMWAY'S GIANT. Largest of all canteloupes.

3N. K. & CO.'S CREAM CANTELOUPE. Large size, medium early and the best shipper of all the yellow flesh varieties. Splendid, full flavored sort.

GOLDEN EAGLE. (New.) Fruit oval; flesh very thick 5 TIP TOP. Yellow flesh; uniformly good.

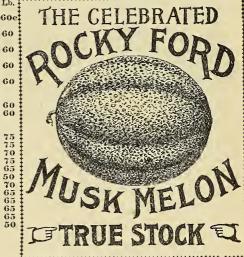

LONG ISLAND BEUATY. Very early; fine quality. SMELROSE. A very hardy, early, vigorous variety.

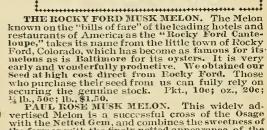

EXTRA EARLY CITRON, or NUTMEG. Good size.

3 EMERALD GEM. Extra early; very sweet.

3 JENNY LIND. Very small and very early; fine flavor 3 HACKENSACK. Large, round skin; quality good.

3 HACKENSACK. Large, round skin; quality good. 20  $\frac{25}{25}$ JENNY LIND. Very small and very early; fine flavor HACKENSACK. Large, round skin; quality good....BANQUET. Round; densely netted; very sweet...BANANA. Resembles banana in shape and flavor.... 20 20

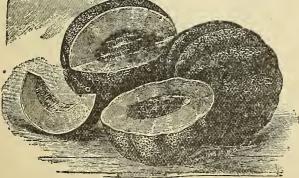

with the Netted Geth, and combines the sweeters of the Gem. The flesh is of an orange red color like that of the Osage, but of higher tint; it is even richer than the Osage in flavor.

It is a spiendid shipper, and is of just the right size for hofel or table use. Pkt., 5c; oz., 15c; ¼ lb.,

25c; 1b., 75c.

Paul Rose Musk Melon.

#### WATER MELON.

Our Packets of Water Melons contain on an average about 100 Seeds.

NORTHRUP, KING & CO.'S KLONDIKE. The earliest. The great objection to the extremely early water melons has been their inferior quality. This has been entirely overcome in the KLONDIKE, which is offered with the full assurance of not only being remarkably early, but as sweet, delicate and melting in flavor as any variety grown. The flesh is of deep scarlet. Rind thin, and on this account is not a particular good shipping sort. It will ripen in altitudes where it has not been thought possible to mature a good water melon. It is to all other varieties of water melons what the Early Minnesota is to tomatoes. The earliest and of quality second to more. Pkt., 10e; oz., 20e; Jb., 40e; Jb., 40e;

VECETABLE ORANG

<sup>1</sup>4 lb., <sup>25</sup>c; lb., <sup>75</sup>c.

CUBAN OFFEN. Solid, heavy; excellent quality; early. 3 7 15 45 BLACK SPANISH. Large, roundish, dark red flesh; early. 3 7 15 45 JUMBO. Very large; flesh red and very sweet; a good shipping sort; intermediate 3 7 15 45 SOUTHERN RATTLENAKE. Oblong, striped; red flesh; late. 3 7 15 45 CITRON FOR PRESERVES. Round, handsome; for preserving. 3 7 15 45 SWEETHEART. Quality good; an excellent shipping variety; seeds dark gray. 3 7 15 45 SWEETHEART. Quality good; an excellent shipping variety; seeds dark gray. 3 7 15 45 MELON PEACH. The fruit is about the size of a large peach, oval shoped, and of a bright orange color, somewhat russeted. For sweet pickles, pies or preserving they are superb; a few pieces of sliced lemon, or a little lemon essence, adds to their flavor, and is usually desirable. They are easily cultivated, wonderfully productive and can be used in every way in which you would use a peach, except that they are not usually liked raw; although some consider them excellent simply sheed with a little sugar on. Pkt., 5e; oz., 30c.

KENTUCKY WONDER. We introduced this melon in 1886. At that time we thought it the best melon; in 1899 we think the same. One just cause for criticism on many of the new melons that have of late been sent out, is that for the most part they have been, at the best, slightly improved strains of some old and well known sort. This caunot be said of Kentucky Wonder. It is distinct and the melon itself proves il. In shape it

It is distinct and the melon itself proves il. In shape it

is oblong, attaining good size; skin dark green and beautifully marked. Flesh a beantiful, rich scarlet color,

crisp, rich, sugary, always firm and solid, never mealy or tough. Kentucky Wonder has won first prize over such well known and popular sorts as Ironclad, Cuban Queen, Kolb's Gem, etc. Large pkt., 5c; oz., 10c; 14 lb., 20c; 1 lb., 60c.

\*\*RLECKLEY'S SWEETS. We regard this as the finest of all medium carly water melons for home use. The rind is too thin and tender to stand long distanceshipment. The finits are uniform in size, oblong in form, the skin is a rich dark green, the flesh of bright scarlet, ripening close to the skin; the seeds lie close to the rind, leaving a very large solid red core which does not crack open when ripe. The flesh is rich, sugary and melting to the highest degree, being cutively free from any stringaness. As before said, we regard it as the finest of all melons for home use. Pkt., 5c, az., 10c; 4 lb., 25c; lb., 75c, postpaid.

# NORTHRUP, KING & GO.'S GRAND NEW GLOBE ONIONS.

field Onion seed I raised 726 bushels of splendid onions. Not a scullion among them. They ripened early and were large ersfield Onion seed 1 raised 300 bushels of the handsomest onions I ever saw. There them. They ripened early and were 'arge in size. I have been an onion grower for 13 years, have bought seed from many houses, but I never had any onions equal to the Globe Wethersfield."

A. T. Moor, Minneapolis. were not to exceed one-half bushel of poor onions among them. I showed them at the Anoka Street Fair and took first C. E. LA PLANT. Dayton, Minn.

From a Photograph showing the type of our Globe Wethersfield and
Minnesota White Globe,

Our Grand New Minnesota Globe Onions.

Globe shaped onions are the onions of the future. They are the most attractive in appearance and most economical in use. They command the highest price in market. They are more profitable than flat varieties to grow, as they occupy no more room in the row, but weigh more and measure better.

Recognizing, 6 years ago, the tendency of the trade, we took up Globe shaped onions as a special study. We found two types of Yellow Globe, viz: Yellow Globe Danvers and South. port Yellow Globe. We found four Red Globe onions, viz: Extra Early Red Globe, which, not being a good keeper, is fit only for early bunching; Early Red Globe, which is quiteearly, but undersized: Large Red Globe, which is of fair shape but not early; Southport Red Globe, late and of undesirable shape. In White Globe Onions we found but one, the Southport, late and undesirable in shape. In short, we found no Red or White Globe Onion compared with the favorite Yellow

Globe Danvers in shape, in size and in comparative earliness. In our Globe Wethersfield and Minnesota White Globe Onions we have strains which are as early and as perfectly Globe shaped as the best strains of Yellow Globe Danvers. They are far superior to the Southport Red and White Globe, as they ripen off much earlier, are much better keepers, and do not have the wasteful feature characteristic of the Southport—the long and useless neck and bottom.

#### N., K. & CO.'S. GLOBE WETHERSFIELD ONION.

This we consider to be the finest and most select type of Red Globe Onion in existence. We have called it N., K. & Co.'s Globe Wethersfield in order to distinguish it from all other stocks of Red Globe Onion, from which it differs not only in purity of stock and perfection of shape, but in carliness, productiveness and beauty of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. Large pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50.

#### N., K. & CO.'S MINNESOTA WHITE GLOBE

Is much earlier than the Southport White Globe and keeps better. We know of no other stock of White Globe Onion which compares with this. Large pkt., 5e; oz., 25e; ½ lb., \$1.00; lb., \$3.00, postpaid.

Every Pound of our Globe Wethersfield and Minnesota White Globe is of our owngrowth in the State of Minnesota.

This cut shows the general shape and character of the Southport strain of the Yellow, Red and White Globe Onion. The extended neck and bottom mean not only waste, but it takes so much time for the "neck" to dry down as to make the onions very late. In our Minnesota Globes we have sought to eradicate this objectionable feature, as shown by the dotted lines. Our Minnesota grown seed not only produces the earliest onions, but the heaviest and longest keeping stock.

We consider our Minnesota Grown Onion Seed the Finest in the World. We do not believe that any seed grown will produce Onions that will Ripen as Early, Keep as Long, or produce as small a percentage of "thick necks" or "scullions."

Our Packets of Onions contain on the average about 1,500 Seeds. One ounce will sow 100 feet of drill; 4 to 5 Ibs. to the acre are required for large Onions, 50 to 60 lbs. to the acre for sets or pickles.

Large pkt. Oz. ¼ib. Lb. EXTRA EARLY RED FLAT. (Sometimes called Extra Early Red Wethersfield.) A medium Red Wethersheld.) A medium sized flat variety, good yielder. Ready for use about two weeks earlier than Large Red Weth-ersfield. Very desirable for early marketing. Best where seasons are very short. Good

"I made a mistake in planting the Red Wethersfield Onion I got from you. I put the seed in thick, allowing for bad seed, BUT THEY ALL CAME UP, and gave me the trouble of thinning them out. It is a MARVELOUS ONION." Angus McDowell, Wansankee, Wis.

"Your Red Wethersfield Onions were the finest I have ever grown."-D. H. TRACY, Effington, S. D.

Mr. Robert L. Gould.

"I have been buying vegetables on the St. Paul market for the last seven years, shipping same largely in carload lots to different parts of the country. I am glad to say a few words about the showing your seeds have made in this vicinity, for I think it is just as important to the shipper to sell good vegetables as it is for the grower to produce them, as we can get the top prices for quality, and a satisfied customer always comes again.

As an instance, I will mention that I bought this fall, from one gardener near St. Paul, 1,125 Baskets of Frizetaker

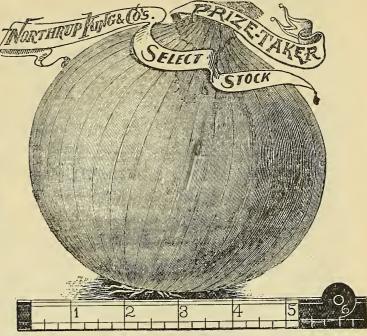

Onions that were produced from 6 lbs of your seed. They were the handsomest lot of Prizetakers I ever laid my eyes on. I paid a big price for them, about 40 per cent. above the market price for ordinary onions, but I got a big price for them myself. The grower was satisfied, I was satisfied, and my customer was satisfied. That is the way it goes.

I want also to mention your Minnesota WhiteGlobe and Globe Wethersfield Onion. Your White Globe is particularly choice, and your Globe Wethersfield is the earliest and best stock of Red Globe Onion ever offered on this market

The Cabbage and Golden Self-Blanching Celery from your seed are also deserving of the highest praise.

If everybody sold as good seed as you do, the work of the produce and commission men would be greatly lessened, and much annoyance would be saved all parties concerned.

Very truly yours, ROBERT L. GOULD, St. Paul, Minnesota.

ONIONS.

MAMMOTH SILVER KING. In appearance the most striking onion grown. We hardly know which to commend the most, its large size, symmetrical appearance and beautiful silvery flesh, or its sweetness, tenderness and mild flavor. These qualities make it the best for exhibition and fancy high priced trade. Not recommended for the extreme North. Large pkt., 5c; oz., 15c; ½ lb., 50c; lb., \$1.75, postpaid.

PRIZETAKER. This onion has become a great favorite on account of its large size and great strikity. It is perfectly either suppositions of the process are very small

PRIZETAKER. This onion has become a great favorite on account of its large size and great solidity. It is perfectly globe-shaped, with bright straw-colored skin; the necks are very small and the onions always ripen up hard. An excellent keeper, exceedingly fine flavor, grows to an enormous size, onions weighing 5 lbs. having been grown from seed the first year. Large pkt., 5c; oz., 15c; ½ lb., 50c; lb., \$1.75, postpaid.

SPANISH KING. This handsome variety is a splendid type of the Yellow Spanish Onion. The flesh is remarkably firm and of the finest quality of quite rapid growth, and matures medium early. The skin is of a transparent golden straw color. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., \$1.00, postpaid BERMUDA ONIONS. These onions grow to an immense size and are of beautiful form. The skin is very thin; flesh white, fine grained, of mild and pleasant flavor. It will grow an onion from one to one and a half pounds from seed, but to attain the full size the bulb should be set out the following spring. White or Red, pkt., 5c; oz., 20c; ½ lb., 60e; lb., \$2.00.

WHITE BARLETTA. This variety is most distinct, on account of its great earliness. It is earlier than the White Queen. It is of a beautiful waxy white color and grows 1½ inches in diameter and ¾ of an inch thick, with finely formed bulbs, slightly flattened at the top. Its earliness will highly recommend its use as a substitute for onion sets. An excellent pickling sort. Pkt.,

eter and \(^4\) of an inch thick, with linely formed builds, significant flattened at the top. Its earliness will highly recommend its use as a substitute for onion sets. An excellent pickling sort. Pkt., 5c; oz., 20c; \(^4\) bi, 65c; ib., \(^4\)2.25.

AUSTRALIAN BROWN. A grand new Onion from Anstralia. This is a truly remarkable variety, remarkable in three ways: 1st. They ripen extremely early. 2d. They keep almost indefinitely, nuch longer than will anyother onion. 3d. They never make anythick necks or scullions. These points are alone sufficient to insure its popularity, but, in addition, the onion is of unusually seem with the control of ally fine quality and very attractive in appearance. Large pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., \$1.65.

#### THE IMPORTANCE OF USING NORTHERN GROWN ONION SETS.

Onion Sets are planted in order to obtain onions earlier than they can be had from seed. It follows, therefore, that Northern Grown Onion Sets will produce onions earlier than Southern grown sets. In addition to this, our Minnesota grown sets are incomparably superior to ordinary stock, being of small size, sound and free from trash. Prices subject to marker changes. If wanted by mail, addited in 1, 200 a guart for postage. Pints supplied at quart, pecks at busilel rates. 28 lbs, constitute a bushel of top sets. On all other sets we give 32 lbs, for a bushel. Most houses sell by measured bushel; by that process, the larger and more "chaffy" the sets, the less quantity the purchaser receives.

#### PARSNIP.

Our Packets of Parsnip contain on the average about 1,500 Seeds.

HOLLOW CROWN. We believe this is the finest stock of Parsnip that can be procured. The roots run of uniform size, and are smooth. The growing taste for this delicious vegetable will make this improved strain particularly desirable. Pkt., 3c; oz., 7c; ½ lb., 15c; lb., 5bc

LONG SMOOTH. A fine flavored variety. Pkt., 3c; oz., 7c: 14 lb., 12c; 1b., 40c.

EARLY ROUND. An early variety but of small size. Pkt., 3c; oz., 7c; ½ lb., 15c; lb., 50c.

#### PARSLEY.

Our Packets of Parsley contain on the average about 2,000 Seeds.

CHAMPION MOSS CURLED PARSLEY. For garnishing; no variety is more attractive when well grown; resembles a tuft of finely curled moss, is hardy and slow in running to seed. Pkt., 3c; oz., 7c; ¼ lb., 20c; lb., 60c, postpaid.

gardens we commend this sort. Pkt., 3c; oz., 7c; ¼ 1b., 20c; 1b., 70c.

HAMBURG OR TUR-NIP-ROOTED. A fleshy-rooted kind; the roots used for flavoring soups. Pkt., 3e;oz., 7e; ¼ lb., 15e; 1b., 50c.

EXTRA DOUBLE CURLED. A fine dwarf variety, beautifully curled; excellent for garnish-Pkt., 3c; oz., 7c; 14 ing. Pkt., 3e; 1b., 20c; 1b., 50.

PLAIN. The leaves of this sort are plain; it is hardier than the curled variety. Pkt., 3c; oz., 7c; ¼ lb., 15c; lb., 50c.

Moss Curled Parsley,

TO MARKET GARDENERS:—Market gardeners, as a rule, send away from home for their seeds. Our orders from distant cities are increasing in number and size each year, and this of course gives us great satisfaction. We are best pleased, however, to be able to state that we have and hold the trade of the best gardeners of our

**ZONO NEW KARANTANA KARANTANA** 

MR. A. K. BUSH, Dover, Minn.

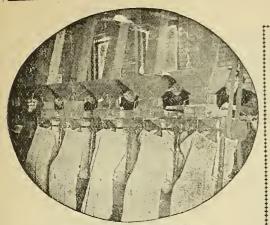

should have this folder, entitled, send us an order and ask for it.

# THE FARMER'S GARDEN.

Farmers as a class do not have good gardens. This is doubtless owing to the rush of work in the spring, and to the fact that hand labor is expensive and not always 🏖 available.

MR. A. K. BUSH, Horticulturist, with the Minnesota Farmers' Institute, also a practical gardener and farmer, has, at our request, prepared an illustrated plan of the Farmer's Garden he is advocating. It is the most practical thing of the kind ever brought to our attention, and does away very largely with hand labor. MR. BUSH'S plan provides for a Fruit and Vegetable Garden that may be easily cared for with the aid of a horse and ordinary farm cultivator. It is illustrated by a diagram, and instructions are given as to culture, rotation, etc. farmer, in fact every one who has or wants a garden, "The Farmer's Garden." It is Free to those who

Scientists make the startling assertion that lung and kidney ailments are rapidly increasing among the farmers of America, and assign as one of the principal reasons, the lack of vegetable food in sufficient variety. 

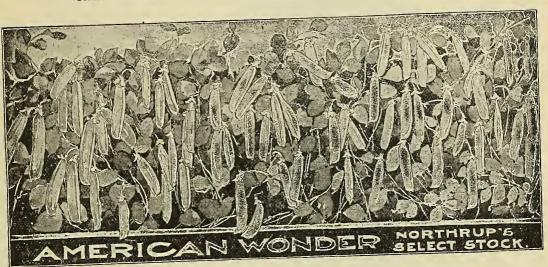

A Corner of our Picking Room. From a Photograph.

#### SEED PEAS.

NORTHERN GROWN SEED PEAS are EARLIEST, HARDIEST, MOST PRODUCTIVE, and we make a SPECIALTY of them. The level fields of the Northwest produce crops of uniformity unknown in other pea growing sections. Our crops are thoroughly "roguged" while growing. Samples are fine, free from the pea weavil and thoroughly handpicked.

PRICES. In order to encourage purchases from large planters who live at distant points, we have made exceptionally low prices. Freight rates named on application. Note also that pints are supplied at quart prices. Pecks and half bushels at bushel prices. No charge for bags. Do not overlook that, as our quart prices include postage, 15 cents a quart—7 cents a pint should be deducted if sent by express or freight at purchaser's expense, either alone or with other seeds.

Peas are a short crop this year and prices ruling much higher.

#### FIRST EARLY PEAS.

Our Packets of Peas contain on the average about 150 Seeds.

One quart will plant about 100 feet of drill. One and one-half bushels to the acre.

# To Our Customers.

WE WANT SOMETHING BESIDES YOUR MONEY. We ask your co-operation in our efforts to supply first-class seeds at the lowest possible prices. You can aid us and aid others in three ways:

1st. By reporting to us the results of seeds you buy from us, whether satisfactory or not, stating particulars as far as possible. 2d. If our seeds please you, by informing your friends. We shall be glad to send our catalogue to any whose names you may find it convenient to send to us. Many Seedsmen expend from Ten to Twenty Thousand Dollars yearly in advertising their catalogue. We believe that the best advertisement is a satisfied customer. 3d. By criticising our catalogue and telling us how, in your judgment, it can be made more effective. We shall greatly appreciate your kindly criticisms.

#### peranamenta de la principa de la company de A WORD ABOUT PRICES.

In purchasing an article of clothing, purchasers can examine its texture, and satisfy themselves as to its quality, and there are tests which will determine the value of every article of merchandise Except SEEDS, for which the only test is that of time. Frequent advantage is taken of this by seedsmen, to ask

unreasonable prices for their seeds. and when asked why their prices are high-er than those of other firms, their reply is, "Be-ware of Cheap Seeds." etc. We say too BEWARE OF We say too BEWARE OF CHEAP SEEDS, whether sold at ridiculously low or ridiculously high prices, for there has been as much humbuggery in the one as in the other. By G00D SEEDS at Fair Prices, we mean the Best Seeds obainable at prices that are fair to the purchaser and to the seller.

.80

Market gardeners, as a rule, send away from home for their seeds. Our orders from distant cities are increasing in number and size each year, and thus, of course, gives us great satisfaction. We are best pleased, however, to be able to state that we have and hold the trade of the best gardany we could and would be glad to print, if space admitted.

"I Recommend your Soeds to my Fellow Gardoners."

I have relied upon you for my seeds for about 12 years. Your seeds have helped make my business the success it has become. I confidently recommend them to my fellow gardeners.

HENRY BACHMAN, Minneapolis. "Can One Say More?"

I have purchased the greater part of my seeds from your noise for the last fourteen years, and speak from long experience when I say they have given perfect satisfaction. of my seeds from your house for the Can one say more?

FRED BUSCH, Yours truly, Minneapolis. "Not Part of the Time, but All the Time."

I have purchased the greater part of my seeds of your house for more of my seeds of your honse for more than 12 years, and they have given me every satisfaction. It is worth a great deal to a market gardener to know where he can get good seeds, not part of the time, but all the time. NELSON REEVES.

Minneapolis, Nov. 15, '97.

Mr. Bachman has built up a large plant. He has now 35,000 feet of glass, the outgrowth of a very small beginning. He also cultivates an extensive market garden.

Mr. Rusch is the most extensive market gardener in the State of Minnesota. He owns seventeen large greeuhlouses, having 75,00 feet of r.lass. His specialties are Cucumbers, Tomatoes, Radishes and Lettuce. These he sells mot only throughout the Northwest, but ships largely to Chicago, St. Louis and other leading markets. The preceding statement from a man like Mr. Busch means a great deal.

#### RADISH.

French Grown Seed makes solid Radishes. Our Packets of Radishes contain on the average about 900 Seeds.

light, rich, quick soil is best for Radishes.

NEW TRIUMPH RADISH. This is a decidedly unique novelty in Radishes. It is very early, being a "Twenty Day" Radish, of globular form, and its tops are very short, which makes it valuable for cultivation under glass. The flesh is very crisp and solid and of mild flavor. Its most distinctive feature, however, is the unique color of the skin. The ground color is pure white, striped horizontally with bright searlet. It is a most attractive ornament for the table, and market gardeners will find ready sale for it. Some of the roots may come in solid color, the strain not being quite "fixed" yet. Pkt., 10c: oz., 30c.

ket
EARLY SCARLET GLOBE. Fine for forcing or open ground.
EARLY WHITE BOX. Similar to White Turnip, but larger.
ROSY GEM. A fine, white tipped sort....... 50

New Triumph Radish.

 
 OLIVE SHAPED.

Large Pkt. Oz. 1/1h Ih

MAMMOTH CHILL. Attains enormous size, often reaching a weight of 200 lbs, Despite its size, its flesh is rich and fine flavored. It is especially desirable for stock feeding and exhibition purposes. Largepkt.,5e; oz., 10e; 14lb., 20e; lb., 70e. HUBBARD. (N., K. & Co.'s Selected stock.) The great popularity of the Hubbard has led us to pay particular attention to our stock of this important sort. It is hardly necessary to say that the Hubbard is the standard sort not only as a long keeper, but not only as a long keeper, but on account of its quality, which is unsurpassed. Large pkt., 5c; oz., 10c; ½1b., 20c; lb., 70c.

WARTED HUBBARD. A

Hubbard Squash, large, blackish green, hard as wood, with ish green, hard as wood, with warty knobs all over it, satisfies even the inexperienced observer that it is rich in quality, a keeper and thick fleshed—such will sell at sight, while ordinary small, irregular, poorly colored specimens stay on the stand until they rot. This strain has become very popular. Pkt., 5c: oz., 8c; ½lb., 25c; lb., 80c.

MERRELL, SOULE & CO.,
Manufacturers of
PURE FOOD SPECIALTIES.

MERRELL, SOULE & CO., Mortheup, King & Co., Minneapolis, Minn.

Manufacturers of Gentlemen: The second carload of Hubbard Squash is received and found in perfect condition.

Both carloads have been far, Superfice in QUALITY and SIZE to any we have been able to secure in any other territory. For this reason we think it would be a good scheme to buy some of your seed. We could make us a reasonable figure.

Yours truly, MERRELL, SOULE & CO.

TOMATO. Early Minnesota. We cannot claim the honor of having originated this Tomato, but early appreciating the great value of a Tomato as early as this, and which at the same time possessed the good qualities of the later sorts, we have devoted every attention to still further developing its excellent characteristics, so that we think we may justly claim possession of the best stock of this sort in existence. We consider it superior to the Imperial, Ruby, or Early Michigan in points of shapeliness, color, smoothness, solldity and flavor, while for EARLINESS it is not approached by any good Tomato. Large pkt., 15c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50.

AMERICAN COFFEE BERRY. (Soya Bean.)

#### Coffee (and very good Coffee, too) for one Cent a Pound.

While nothing quite takes the place of good old Java or Mocha Coffee, the Coffee Berry, when used alone, makes a healthful, pleasant and economical beverage, with a strong coffee flavor, and quality superior, in our estimation, to many coffee substitutes now on the market. When blended and ground with good coffee, half and half, its presence can scarcely be detected. It is prepared just like coffee. The beans, which are about the size of the real coffee berry, are roasted, ground, and used either alone or mixed with coffee, as may be preferred. The plant, which takes from four to four and one-half months to mature, is about three feet in height. It fruits from the ground up, and on the limbs in every direction. The pods, of which there are from 150 to 250 on a plant, touch each other, so closely together do they grow. The pods contain on an average from two tothree beans, of the shape and size shown in the illustration. Not recommended for culture south of latitude 11°.

south of latitude 41°.

CULTURE. The rows should be planted three feet apart, one berry every ten inches apart in the row. Cultivated like corn or beans, and should be planted about the same time. PRICE: Large pkt., 10c; ¼b., 25c; lb., 75c; 5 lbs. @ 60c, by mail postpaid. Special prices in large quantities.

FOR RUTA BAGA OR SWEDISH TURNIPS, SEE PAGE 5.

#### HERBS.

Utilize the corners for a few Pot and Sweet Herbs (for flavoring somps, meats, etc.), indispensable to every garden, while Medicinal iterbs will be found useful. Thrive nicely along sunny side of fence, in a deep, fairly rich soil.

#### ARTICHOKE ROOTS.

The New Large Jerusalem Variety; producing from 400 to 1,000 bushels per acre. An excellent food for cattle, sheep and horses. Fed to milch cows, they are for the production of milk, equal if not superior to bran. But their greatest value is for food for hogs. Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes they and their pigs invariably do well. There is no better food to build up large, healthy frames, with plenty of bone and muscle. Hogs will not only grow, but fatten on them.

On good land, with the same culture as corn, Artichokes will produce from 400 to 1,00 bushels per acre. A. C. Williams, of lowa, a very prominent breeder of Poland Chinas, says: "Forty head of hogs and pigs may be kept without other food on an acre of Artichokes from the time frost is out of the ground until they grow again, and from October 1st until the ground freezes again. They produce more hog food per acre than any other crop I am acquainted with, and the hogs will harvest the crop tiemselves. Artichoke also produce an immense quantity of tops, of which cattle, horses and mules are very fond, and which makes excellent food when properly cared. A chemical analysis of roots shows them to be superior to Carrots, Parsnips, Mangels, Sugar Beets and Turnips, both as flesh and as fat formers."

PLANTING, CULTURE, PRICE, ETC. Artichokes need planting but once, and little or no culture after the first year. Cut as potatoes, only smaller, plant in rows three and one-half feet apart. Plow deep, plant shallow, asy two inches; the second year, break up the ground as for corn; will come up thick all over the surface. Fun through each way with a cultivator when a few inches high. Price, 1 lb., 30e; 1 lbs., \$1.00, by mail postpaid. By freight or express, \$2.00.

#### ASPARAGUS ROOTS.

By far the most satisfactory way to obtain an Asparagus bed is to set out the roots. We send out no roots that are less than two years old. They may be sent by express or freight, with the assurance that they will arrive in perfect condition for planting.

Asparagus Roots are sent only by Express at purchaser's expense. They are warranted to reach destination in good growing condition.

OUP SCHOOL GAPGEN FLOWER MIXTUPE and ITS NAME had their origin in a work an's Improvement League in Minneapolls, towards interesting children of the Public Schools in this city in the knowledge and culture of flowers.

As it was desired that each child should grow a number of varieties, the League was at the outset confronted with the problem of how to furnish so many thousand pupils a sufficient assortment for the compara-

tively small amount of money available for that purpose.

They discussed this matter with us and we suggested that a mixture be made of a number of the best and most popular annual varieties, and that a large packet of this mixture be given to each scholar. This plan was adopted, and for the results obtained it is sufficient to refer to the letters from Dr. Charles M. Jordan, Superintendent of the Minneapolis Public Schools, Mrs. T. B. Walker of this city, and Mrs. Barnard, Chairman of the League Flower Committee, as well as to the fact that for five years we have supplied this mixture for the same purpose to the Woman's Improvement League.

So popular has this mixture become that we last year sold it at the nominal price of 25 cents a packet, and offered \$150.00 in CASH PRIZES to those growing the largest number of varieties from a single packet. Elsewhere will be found the report of the awards, together with the letters and photographs of

successful competitors.

This mixture gave such universal satisfaction, and the contest awakened such interest among our customers, that we have decided this year to offer CASH PRIZES amounting to \$200.00, which will be paid as hereinafter specified to those sending in their reports on or before November 1st, 1900.

CAUTION. We wish to emphasize the fact that our SCHOOL GARDEN FLOWER MIXTURE is not to be IN ANY WAY compared with mixtures offered as "WILD FLOWER GARDEN MIXTURE" or UNDER ANY OTHER NAME. These, for the most part, are made up from seeds that have been "left over" at the end of the season, or have lost vitality.

OUR SCHOOL GARDEN FLOWER MIXTURE is composed of the finest and freshest Seeds obtainable, and contains the rarest and most beautiful annual sorts, obtained at large expense from the most reliable flower seed specialists of America and Europe, especially for this purpose. The price at which we offer this Mixture, 25 cents, has enabled us not only to increase the size of our packets, but to add many new and magnificent sorts, so that now it might well be called The Complete Flower Garden Mixture, embracing, as it does, nearly every desirable flowering annual grown.

A large packet, amply sufficient to plant a bed 30 feet square, will be sent postpaid to any address on receipt of 25 cents. (Stamps accepted.) Full cultural directions are printed on the back of each packet. The possession of the packet entitles the holder to compete for the \$200.00 cash prizes.

# School Garden Flower Mixture Prize Winners for 1899.

MRS. F. E. BREWSTER, Minneapolis, Minn. 1stPRIZE FOR BEST ESSAY, \$10.00.

MRS. ROBERT McNAUGHTON. Aberdeen, S. D. 3d PRIZE FOR GREATEST NUMBER OF SPECIES,\$15.00.

MRS. M. SARVER. Hamilton, N. D. 1st PRIZE FOR BEST PHO-TOGRAPH, \$15.00.

MISS MINNIE HEMINGSON. New Richmond, Wis. 7th PRIZE FOR GREATEST NUMBER OF SPECIES, \$2.00.

We take pleasure in presenting portraits of nine of the PRIZE WINNERS in our SCHOOL GARDEN FLOWER CONTEST for 1899. We were unable to obtain photographs of the other five successful contestants. Our checks for the proper amounts were sent to the respective prize winners immediately after we received the committee's report.

HOW THE PRIZES WERE AWARDED.

The letters, lists, mounted specimens, etc., received up to Nov.1st, and of which there were several hundred, were placed in the hands of a committee of newspaper men of Minneapolis. The report of the committee is as follows: MESSRS. NORTHRUP, KING & CO., Minneapolis, Minn. Minneapolis, Minn., Nov. 20th, 1899.

GENTLEMEN: After carefully examining the great number of reports, essays, photographs, etc., turned over to us in your School Garden Flower Mixture contest, we have decided the award for prizes as follows. We are pleased to add that we have been greatly impressed with the interest manifested in this contest and with the great value of the seeds given in these packages for the small sum of 25 cents. Yours very truly,

F. W. LEAVITT, The Housekeeper. W. G. CHAMBERLAIN, The Journal.

D. C. MCCONN, The Times. OSCAR DAY, The Tribune.

#### \$100.00 For the Greatest Number of Species.

1st, Mrs. LAURA H. FERNALD, Freeport, Me. \$40.00
2d, Mrs. W. F. WILCOX, Benson, Minn. 25.00
3d, Mrs. ROB'T McNAUGHTON, Aberdeen, S.D. 15.00
7th, MISS MINNIE HEMINGSON, New Richmond, Wis. \$2.00. \$10.00 3.00

#### \$30.00 For the Best Photographs.

tst, Mrs. M. SARVER, Hamilton, N. Dak. \$15.00 2d, Master HAROLD G. SIMPSON, Minneapolis, Minn. \$10.00 3d. EMMA ELLENBERG, Alden, Minn. \$5.00.

#### \$20.00 For the the Best Essay.

3d, Miss TESSIE TERRIE, Crawfordsville, Ind. \$3.00 4th, Miss MABEL BACON, Emporia, Kans. 2.00 tst, Mrs. F. E. BREWSTER, Minneapolls, Minn. \$10.00 2d. JOSIEVANDERGONE, Maple Lake, Minn. 5.00 WHAT THOSE WHO HAVE GROWN OUR "SCHOOL GARDEN MIXTURE" THINK OF IT.

Our space only admits of brief extracts from a few of the many hundreds of letters we have received expressing the satisfaction this mixture has given those who have tried it, and it is no exaggeration to say that we could fill this entire catalogue with letters written in praise of this mixture, pleasing and satisfying the most skillful flower growers, as well as the youngest and most inexperienced beginner in floriculture.

#### "New Varlety Every Day."

It was the most beautiful flower mixture I ever saw, there being a new variety nearly every day. Arnold Lien, Delavan, Minn.

#### "Many I Had Never Seen."

The hundreds of the Flower Garden Mixture flowers contained many I had never seen be-fore and cannot find a name for. Mrs. F. W. HAYDEN, Glencoe, Minn.

#### "Surprised and Delighted."

I was surprised and delighted with the beautiful bod of flowers and the large number of species grown from one packet.

IDA L. NOBLE, Washington, Iowa.

#### "Most Beautiful in Day County."

But the groutest wonder to us all was your School Garden Flower Mixturo. It is a moro beautiful flower garden than people over saw in Day County.

CARRIE F.ALTHOFF, Wathbay, S. D.

#### "Even the Baby."

It made a beautiful collection of flowers and we all onjoyed them so much, even the baby. Mrs. E. M. LIVINGSTON, Park Rapids.

#### "Every One in the County."

My flower bod was the admiration and sur-prise of everyone in this county. LAURA A. CANON, Trasky, Minn.

#### "Amply Repaid."

If every packet of School Garden Mixture sent out gave as much pleasure as mine did, you may feel amply repaid. Mrs. G. H. Brown, St. Paul, Minn.

#### "Surprise to Hundreds."

I had a flower bed from your mixture which was a surprise to the hundreds who saw it. There were now flowers every day. LEONGRA PRESCOTT, Mayvillo, Ind.

#### "Admiration of All."

Many visitors said they never saw such a beautiful sight before. Mygarden was the ad-miration of all. EDA ANDERSON, Fir, Minu.

#### "Afforded Great Pleasure."

The School Garden Mixture ufforded me the greatest pleasure as well as the many neighbors who came to see the flowers.

Mrs. J. R. Wilson, Bloomville, Ohio.

#### "Never Saw Anything Like It."

I never saw anything like It before, and the many who have seen it have marveled at the beauty of the foral display. Miss Patterson, Alexandria, Minn.

#### "Children were Delighted."

The children were delighted and took great pleasure in caring for the flowers. Mrs. Carraway, Muncie, Ind.

#### "Accept Thanks of the Family."

Let me teuder you the combined thanks from our entire family for the pleasure derived from the School Garden Flower Mixture. Mrs. Wilcox, Benson, Minn.

#### "More Than Pleased."

I assure you I was more than pleased with the beautiful display of flowers, from early spring until late in the fall. Miss Badiann, Warren, Minn.

#### "So Many in One Garden."

No one around here ever saw so many kinds and colors of flowers in one garden before. CARRIE ANDERSON, Bartlett, N. D.

#### "Real Enjoyment."

I have had more real enjoyment from the results of one package of School Garden Flower Mixture than ever before from many different packages at an expense 100 times greator. Guy Brackett, Excelsior, Minn.

#### "Well Repaid Me."

The flowers were lovely and well repaid me for all their care.

ETHEL ATKINSON, Park Rapids, Minn.

#### "Over a Thousand Plants."

I should think I had over a thousand plants altogether. Only one did not bloom. Mrs. Laura II. Fernald, Freeport, Me.

# School Garden Flower Mixture Prize Winners for 1899.

Mrs. Flora Ferguson, Lancaster, Ontario. Sixth Prize for greatest number of Species. \$3.00.

Mrs. W. F. Wilcox, Benson, Minn. Second Prize for greatest number of Species. \$25.00.

Harold Goodsir Simpson. (8 years old.) Minneapolis, Minn. Second Prize for best Photograph. \$10.00.

Mrs. Lanra Hall Fernald, Freeport, Maine. First Prize for greatest number of Species. \$40.00.

Miss Josie Vandergene. Maple Lake, Minn. Second Prize for best Essay. \$5.00.

LETTER FROM DR. CHARLES M. JORDAN,
Superintendent of Minneapolis Public Schools.

MINNEAPOLIS, Nov. 1st, 1897.

NORTHRUP, KING & OO.:

GENTLEMEN: I desire to express the obligations under which the public schools of this city are to your firm for the interest you have shown in the flower work organized among the pupils of the public schools by the Woman's Improvement League. This movement has already accomplished a great work. It has interested thousands of the school children in the cultivation of flowers, and has done a great deal toward beautifying the city. Many an unsightly yard has been transformed into a beautiful flower garden by means of the flower seeds which were generously contributed by Northrup, King & Co. These seeds, so far as I have been able to observe, "always grow." Yours very truly,

Central High School, flinneapolls, Minn.

CHAS. M. JORDAN, Supt.

### LETTER FROM MRS. BARNARD,

Chairman Flower Committee, Minneapolis Improvement League.

NORTHRUP, KING & CO.,
KIND SIRS: Please accept sincere and hearty thanks from the KIND SIRS: Please accept sincere and hearty thanks from the Minneapolis Improvement League for your generous gift of seeds fornine thousand children. I wish to express the highest praise for the "School Garden Mixture," as it has yielded in many cases wonderful results. I wish I had accomplished my purpose last year and taken photographs of some of the little gardens. As high as one hundred and fifty plants have been reported from some of the packets. Many of the gardens were most beautiful.

Respectfully, MIDRED M. BARNARD, Chairman Flower Committee, Minneapolis Improvement League.

Minneapolis, May I, 1897.

LETTER FROM MRS. T. B. WALKER.

MINNEAPOLIS, December, 1898.

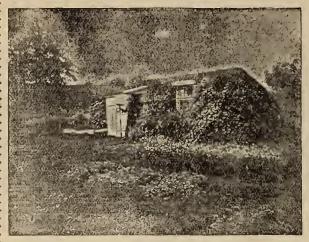

NORTHRUP, KING & CO.,
GENTLEMEN: I have been very much interested in the flower work of the Woman's Improvement League of this city from the work of their work five years ago. They have spared neither work of the Woman's Improvement League of this city from the beginning of their work five years ago. They have spared neither labor nor money in carrying out their schemes for the beautifying of the city through the encouragement of floriculture by the school children. And while their efforts have caused many an unsightly place in the city to disappear, and many an univiting neighborhood to become like a little park the best part of their work has been the cultivation in the hearts of the children of the love for the beautiful while caring for their little gardens.

Your firm is deserving of great credit for the assistance which you have rendered to the league in assisting to furnish the seeds for their work, and they appreciate most highly what you have done. I sincerely wish that other cities and country neighborhoods would adopt the same plans of encouraging the children to "cause the wilderness to blossom as the rose," for no greater sweetness enters into the life of a child than that which comes through the love of beautiful flowers, grown by their own hands.

MRS. T. B. WALKER.

MRS. T. B. WALKER.

# A Soldier's Home

The accompanying illustration is from a photograph taken by our artist in the grounds belonging to the Soldiers' Home at Minnehaha Falls, Minneapolis. It is the cottage of one known as the "Hermit Soldier." Here he has lived for years, happy as a man can be. The place is quite an attraction for visitors on account of the great display of flowers, not only about, but all over his house. It takes good seeds to grow in the ground, but it takes specially good ones to grow "on a house." That is why he uses our seeds exclusively.

WILL BE PAID AS FOLLOWS AS PRIZES FOR

NORTHRUP, KING & CO.'S

# School Garden Flower Mixture.

For the Greatest Number of Species grown from a Single Package. First Prize, \$40.00; 2d, \$25.00; 3d, \$15.00; 4th, \$10.00; 5th, \$5.00; 6th, \$3.00; 7th, \$2.00.

Contestants will please observe that the \$100.00 prizes are for the greatest number of SPECIES, not Varieties, grown from a single package. For instance, Asters would count as one, no matter how many different colors or kinds there may be. The name of each variety counted should be given, if known, and specimens sent of those not named.

For the Best Herbarium, or Collection of Specimens from the garden, mounted. First Prize, \$20 00; 2d, \$15.00; 3d, \$10.00; 4th, \$5.00.

Each variety mounted should have its name written on the paper, if known.

For the Best Essay on "How to Grow Northrup, King & Co.'s School Garden Flower Mixture ' First Prize, \$15 00; 2d, \$10.00; 3d, \$3.00; 4th, \$2.00.

For the Best Photographs of the Gardens grown from our "School Garden Flower Mixture." First Prize, \$10.00; 2d, \$5.00; 3d, \$3.00; 4th, \$2.00.

#### CONDITIONS OF COMPETITION.

Reports, Photographs, Mounted Specimens and Essays must be accompanied by the envelope in which the seed was received, and must be in our hands on or before Nov. 1st, 1900.

Our checks for the amount due the prize winners will be forwarded as soon after Nov. 1st as the decision can be made. The names, addresses and (if possible) the pictures of successful competitors will be given in our Cambogue for 1%0. While a Tea mot win the cash prizes, everyone who purchases a package of the School Garden Dixture will feel amply repaid for their investment in the beauty and variety of the flowers they secure.

This mixture is sure to be popular with everyone. Even practiced floriculturists will find much to interest and surprise them in the variety and beauty of the flowers, while children are simply delighted and can scarcely wait until the flowers are unfolded, in their anxiety to see what they are "going to be.

REMEMBER that the possession of a packet entitles anyone to compete for the above mentioned prizes, and will be mailed to any address on receipt of 25 cents.

Do not overlook our offer to send a regular package of our School Garden Mixture FREE with every order for Vegetable or Flower Seeds (or both) in packets, amounting to 75 cents,

ices named in our Catalogue. This offer does not apply to seeds by the pound or bushel, but only to Vegetable and Flower Seeds in packets.

#### NEW AND STRIKING FLOWERS.

Centaurea Imperialis is being "intro-duced" this year under many differ-ent names.

Wherver you buy seeds, purchase of some house which offers them by them by name.

#### CENTAUREA IMPERIALIS.

We have never listed a "novelty" that we take greater pleasure in offering to our customers than Centaurea Imperialthan Centaurea Imperialis, a grand new annual variety from Italy. The flowers, which are of giant size, are of varied tints and colors, in pure white, liac, rose, purple, dark red, etc. They are supported by strong, long stalks, and have an extremely long duration. Centaurea Imperialis is of easiest cul-Imperialis is of easiest culture, an I flowers continutare, an I flowers continuation spring until au-tumn. The Florists' Ex-change, of New York (Aug. 12, 1.99), in speaking of flo-ral novelties, says: "The

Centaurea Imperialis.

12, 1999, in Speaking of 100ral novelties, says: "The
premier place must be assigned to Centaurea Imperialis, which is one of the most
important productions of the present decade. The plant is very vigorous, growing nearly four feet high, easy
to grow, and literally covered with enormous flowers double the size of C. Margaritae, with the same odor and of
the same form. The stems are longenough to satisfy the most exacting 'Belle of New York.'" Pkt., 15c; 2pkts., 25c.

#### NEW GIANT BRANCHING ASTER.

White, Striped with Pink.

California's best 1900 novelty is undoubtedly this magnificent new Aster, which is unsurpassed in beauty and elegance of form. The Giant Branching Comet Asters are quite distinct from all other sorts in shape of flowers. Grows from twelve to fifteen inches high, and covered with large double flowers four to five inches across, their long, wavy and twisted petals forming a loose yet dense half globe, resembling a large flowered Japanese Chrysanthemum. For profusion of bloom, thrifty and upright growth, they stand without an equal. The pink stripe on the white makes a combination of delicate color which fixes the attention of all beholders. Pkt., 10c; 3 for 25c. ROSE, Multiflora True, or New Fairy Roses, from Seed.

They bloom in four months after sowing, so that seed sown in February in the house may be had in June in the open ground, where they continue to bloom throughout the season, giving about an equal proportion of single, semi-double and double flowers, borne in clusters, and contain all the tints and colors of cultivated roses. One of the most unique and novel pot flowers now grown. Aftracts attention everywhere. The only genuine dwarf variety "Rosa Multiflora." Plants grow about one foot high; very hardy, and may be treated as annuals. Pkt., 5c.

#### MOUNTAIN ROSE.

This magnificent climber is one of the most distinct and valuable acquisitions of recent years. Like Ampelopsis Veitchii, it is freely furnished with long tendrils that attach themselves firmly to stone, brick or wooder walls. It grows with the greatest rapidity and soon covers a large area, and are two of Montana, it is absolute by hardy, and can adapt itself to any soil, locality or exposure. It covers posts, pillurs or verandas with a mailform must of heavy green foliage, which in autumn changes to brilliant crimson. With its gorgeous carmine flowers, which are borne in greatest profusion, a well-established plant of this splendid novelty is a sight to behold. Our customers will miss a rich floral treat if they do not secure the Mountain Rose. Pkt., 10c; 3 pkts., 25c. Be sure and order early, as our stock is limited.

# The Famous Flower of the Alps, Everyone has heard of Edelweiss, the famous flower of Switzerland, When we first learned that it was to be introduced into America, this year, at the propriety of offering it, as we have the doubted the propriety of offering it, as we have the propriety of offering it, as a pretty plant, which is offering it, as the propriety of of

#### EDELWEISS. The Famous Flower of the Alps.

Chinese Tea Plant.

Chinese Tea Plant.

CHINESE TEA PLANT. The seed we offer is that of the true Chinese Tea Plant, the Tea of Commerce, the leaves of which we drink. The plant, which attains the size of currant bushes, is an evergreen producing glossy leaves somewhat resembling the orange. The flowers are white with yellow centers and are very beautiful. The large seed pods are also very ornamental. The seeds are very large, about the size of a small chestnut. Price, per pkt. of 5 seeds, 15e; 2 pkts., 25e.

DOUBLE ALLEGHENY HOLLY-

DOUBLE ALLEGHENY HOLLY-HOCKS. Of many rich colors, the grand double flowers of this new straiu are remarkable for their extra large size, novel forms, and graceful arrangement upon the stems. The hardy plants remain long in bloom and are most attractive. Pkt., 5e.

CRAB'S-EYE VINE. A most beautiful climber, either for pot culture or the open ground in summer. Bears clusters of bright yellow flowers, followed by bunches of pods, which when dry, burst open, disclosing brilliant red seeds with black eyes, used for making beads and other ornaments, for which purpose they are exceedingly pretty. Pkt., 5c.

Crotalaria Retusa.

CROTALARIA RETUSA. This striking variety is offered by various Seedsmen under the name of Golden Yellow Sweet Pea, Dwarf Golden Sweet Pea, etc. The blossoms are of a brilliant red coloring set off by a blotch of maroon on the wing. It is a strong, deep-rooted bush, growing about two and one-half feet high, and able to stand alone. It is an annual, blooming early and continuously until killed by frost in the fall. A field of plants is a perfect sheet of gold. A bunch of these flowers placed in water, or mingled with Sweet Peas, form a rich effect and last a long time. As a pot plant, nothing can be more beautiful; while for out-door planting, either with other annuals or massed in a bed, nothing can be more effective. Our seed is obtained direct from the introducer, Miss Florence Gill. Price, per large pkt., 5c; 3 pkts, for 10c. CROTALARIA RETUSA. This striking varifor 10c.

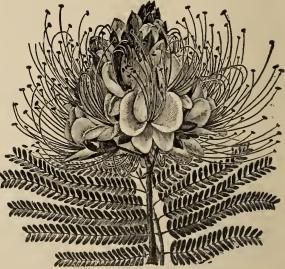

#### DIDISCUS CŒRULEUS.

DIDISCUS CERULEUS. A beautiful and interesting annual which seems to have been lost sight of in the last few years. It blooms most profusely from July until November, plants grow about eighteen inches high and have as many as fifty flowers open at one time of an exquisite pale lavender color. Pkt., 5c.

Phacelia Campanularia.

PHACELIA CAMPANULARIA. A very showy, hardy annual with bright, blue, bell-shaped flowers. One of the earliest annuals to bloom and lasts in perfection a long time. Pkt., 5c.

Bird of Paradise.

BIRD OF PARADISE. (Poinclana Gillesi.) The color of the flower is a golden yellow, measuring 2½ inches across, and are produced in very large trusses. The most beautiful part of the flower is the large pistils, which are spread ont in fan-like form, and are of bright crimson color. The foliage is also highly decorative, reminding one of a very delicate Acacia. If the seeds are started early it will produce blooms in great profusion the first year. Pkt., 5c.

# Select List of Flower Seeds.

#### FREE PREMIUMS.

An order for flower Cr vegetable seeds in packets to the amount of 75 cents, entitles the purchaser to one full sized package of our school garden flower mixture; an order for \$1,50 to 3 packages, with the privilege of compering for the \$200.00 cash prizes offered by us. For full particulars see pp. 47-48-49-50.

Our list of Flower Seeds embraces all the Popular and Easily Grown Varieties, as well as the Best Novelties of recent introduction. It will be noted that all along the line we have made radical reductions in PRICES, and, in so doing, we have sacrificed neither quality nor quantity. Our Flower Seeds are the finest obtainable.

Our Packets, we believe, contain MORE SEEDS, in proportion to the price asked, than those put out by any other house.

We greatly regret that we cannot illustrate every one of the beautiful varieties we list. Prominence is given to a few leading sorts, but many to which but a few lines are given are equally worthy of display.

#### SWEET PEAS.

N., K. & CO.'S IMPERIAL MIXED. (The Finest Mixture.) In making the claim that our Imperial is the finest mixture of Sweet Peas obtainable, we are sustained not only by our own experi-ence, but by the testimony of a great number of delighted customers who have used this mixture for years. Like our Imperial German Pansy, it is made up regardless of expense; the aim being to secure in this combination the largest flowering sorts and finest possible range of colors. Oz., 15c; 4 lb., 30c; lb., \$1.00.

ECKFORD'S FINEMIXED. This elegant mixture embraces the introductions, including recent novelties of Mr. Eckford, the sweet pea specialist of England, who has accomplished more than any other individual in bringing the sweet pea to its present state of boauty, size and perfection. Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 25c; lb., 25c;

N.,K.&CO.'S GOOD MIXED. This is a most excellent mixture, embracing the best standard varieties in all colors. Oz., 6c; ¼ lb., 15c; lb.,

40c. ANEW FEATURE IN MIX-TURES. Pure White Varie-ties, Mixed. Includes Alba Magnifica. Emily Henderson, Mrs. Sankey, Queen of England, Blanche Burpee, etc. Pkt., 5c; oz., 10c; 1/4 lb., 25; lb., 60c, postpaid.

PINK AND WHITE VARI-ETIES MIXED. This mixture does not include any of the pure white varieties, only white in combiwhite varieties, only white in combination with pink. It embraces Adonts Apple Blosson, Blanche Ferry, Duchess of Edinburg, Duchess of York Duke of York, Empress of India, Isa Eckford, Katherine Tracy, Miss Hunt, Mrs. Gludstone, Orid Fainled India, Feach Blossom, Frincess Beatrice, Frincess Victria, Koyal Robe, etc. Pkt., 3c; oz., 8c; ¼ lb. 20c; lb., 60c, postpaid.

DARK VARIETIES MIXED. Includes America, Boreatton, Captain of the Blues, Carmen, Imperial Blue, Indigo King, Monarch, Furple Prince, Stanley, etc. Pkt., 5c; oz., 8c; ¼ lb., 55c, postpaid.

THE BEST NAMED VARIETIES OF SWEET PEAS.
The increasing popularity of Sweet Peas has stimulated the introduction of new varieties to such an extent that the list has become very con-fusing; in fact, many sorts are identical and hardly to be distinguished from one another by the most proficient expert. We consider that the following list of 31 varieties comprises all the really dis-tinct sorts introduced to date.

tinct sorts introduced to date.
We offer them at the uniformprice of 3e a pkt.; oz., 8e; ¼ lb., 20e; lb., 60e, except where otherwise noted.
ADONIS. Deep rose and glowing carmine.
ALICE ECKFORD. Rich, cream tinted standard, white wings. APPLE BLOSSOM. Standard rose pink; wings lightly blushed. AURORA. Gigantio flowers, borne three or four on a stem; color, rich, bright orange, striped and flaked on a white ground.
BLANCHE BURPEE. Pure white, producing three or four very largo white flowers. A most robust grower.
BLUSHING BEAUTY. Rich, delicate blush pink.
GAPTAIN OF THE BLUES. Large flowering, purple and pale blue.

ole blue, CELESTIAL. Delicate lavender, bordering on light blue, CELESTIAL. Delicate lavender, bordering on light blue, COUNTESS OF RADNOR, (See New Countess.)
CROWN JEWEL. Primrose brown, voined with violet rose, DAVBREAK. Watered crimson and scarlet on white ground, EMILYHENDERSON. Pure white of good substance; flowers

good size. EMILY LYNCH. Deep rose pink, shaded with buff; flaked and

EXTRA EARLY BLANCHE FERRY. The most popular the pink and white varieties. Fully ten days oarlier than Blancho

orry.
GOLDEN GLEAM. Deep primroso yellow; large flowered.
GOLDEN GATE. Pinkish manyo and lavender, npright wings.
HER MAJESTY. Beautiful soft roso pink; a vigorous grower

and profuse bloomer,
KATHERINE TRACY, Brilliant pink; good slzo and substance,
LADY BEACONSFIELD. Standards, salmon pink; wings imrose yellow.

LOTTIE ECKFORD. White, lightly edged wit

MARS. Bright crimson of intense color; a gorgeous flower of per-

MARS. Bright crimson of intense color; a gorgeous flower of perfect form.

NAVY BLUE. The only Sweet Pea that is true-blue in color. This is a distinct color, not a tint, and a great acquisition to the list. There is no other Sweat Pea approaching this in color. Pkt., 5c; oz., 20c; ½ lb., 50c; lb., \$1.50.

NEW COUNTESS. Pure light lavender; an Improvement on Countess of Padnor. We consider the New Countess to be the most beautiful Sweet Poa in existence.

NOVELTY. Standard, bright orange rose; wings light manve. PEACH BLOSSOM. Salmon pink standards; wings soft pink. PRIMROSE, Palo primre, o yollow, very distinct in color. SATDEE BURPEE. One of Eckford's new sorts. Fure pearly white; extremely dainty in shape. Flowers are produced on long, stout stems. This fine, new variety received the first-class award of the Royal Horticultural Society of England. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., \$1.00.

30c; lb., \$1.00. \$1.00 PIAN. The most perfect deep crimson sort; grand in form and size, helds its color well and does not turn dark, as do some other

SENATOR. Bright brown and chocolato, shaded and stripod on white

SHAHZADA. A decided addition to the list. dark marcon with a shade of parele; very distinct and attractive. Pkt., 3e; oz., 5e; M lb., 15e; lb., 5oc. STELLA MORSE. A most interesting variety with very long

stems. The blo som opens with quite a suggestion of yellow, which becomes a little lighter as the blower proves ofter. About the third day it is a delicate primrose, and the whole effect is that of a creamy yellow. Pkt., 5c; vz., t Oc; The, 30c; h, \$1.00.

STRIPED CELESTIAL Delicate lavender with stripes.

SOLANUM. (Jerusalem Cher-ry.) Miniature orange tree; fruit scarlet; beautiful. Pkt.,

5c. TOCKS. Large Flowering Ten Weeks. Fine for cut flowers,

both on account of diversity of color and fragrance. The individual blooms frequently or diversity or color and tragrance. The individual blooms frequently measure from 2 to 2½ inches in diameter, ranging in colors from crimson, rose, white, lilac, blue, brown and yellow. Pkt., 5c.

STOCK. Evening Scented. No annual in cultivation equals this in delicate perfume of its flowers. The pink and lilac blossoms partly close during the day, but expand and impart their fragrance in the evening. Include a packet or two of the Evening Scented Stock with your order. You will not regret it. Pkt., 8c.

SWEET SULTAN. Hardy annual. The flowers are large, very fragrant, and an acquisition to any garden. Our mixture comprises the large white, blue, purple and yellow. Pkt., 5c.

SWEET WILLIAM. (Dianthus Barbatus.) Hardy biennial. Produces large heads of rich and beautifully Sweet Wiliam.

colored flowers of many colors and varied markings. Pkt., 3c.

HUNBERGIA. (Black Eyed Susan.) A very elegant climber. Flowers all summer. Best mixed, 3c.

THUNBERGIA.

MAMMOTH VERBENA. The largest Verbena known, a single flower often being as large as a twenty-five cent piece. For garden beds or effective massing the Verbena is unequalled. They bloom profusely the first year from seed, the flowers lasting until late in the autumn. Our mixture is made up of the most brilliant colors, Large pkt. (about (0 seeds), 5c; 3 pkts., 12c.

VERBENA HYBRIDA. The flowers are smaller, but the colors are very fine. Large pkt., 3c; 4 pkts., for 10c.

VERBENA. Lemon Scented. This fragrant plant is easily grown from seed, and succeeds well anywhere. Have a good bed of it in the garden over summer, that you can cut its fragrant foliage and flowers to make up with bouquets. Pkt., 5c; 3 pkts., 12c.

VERBENA. Pure White. A fine strain of large flowering, pure white Hybrid Verbena; trusses large and borne freely at all times; comes true from seed. Pkt., 5c; 3 pkts., 12c.

3 pkts., 12c. VINCA ROSEA. A free flowering perennial, with glossy green foliage and beautiful circular flowers of a fine rose color. If sown early under glass, and transplanted in a warm situation, blooms in summer and autumn.

Pkt., 5c; 3 pkts., 12c.
VIOLET. The violet should not be wanting in any garden, on account of its fragrance and early appearance. A single flower will per-

fume a room; hardy perennial. Finest mixed. Pkt., 5c.

ZINNIAS. Giant Mammoth. A superb new class of Zinnias, giant in size, and perfectly double flowers of richest, most varied colors and shades; plants grow 3 ft. high, blooming freely during long period; particularly valuable for groups. Choicest mixed. Pkt., 5c.

DOUBLE LILLIPUT. Dwarf, compact bushes with very small, perfectly double flowers of brightest colors. Pkt., 5c. fume a room; hardy per-

colors. Pkt., 5c.

Evening Scented Stock. While the flower is pretty, its great charm lies in the sweet and powerful perfume it emits in the evening when the flower opens. (See description.)

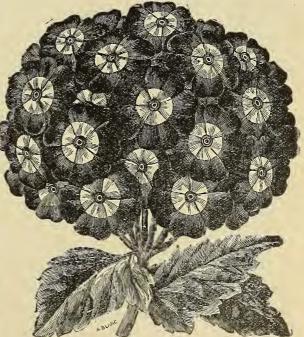

Salpiglossis.

Should be found in every garden. Unrivalled even by the Japanese Morning Glory in its marvelous display of color. (See description.)

ZINNIA. Choice double mixed. Pkt., 3c. WALLFLOWER. These are among the most de

liciously fragrant of all garden flowers; many shadesof color. Pkt., 5c. WILD CUCUMBER. A well known vine, com-mon in many sections, and the quickest climber known for covering verandas, old trees and houses, trelises, etc., never suffering from the heat, but retaining its fresh and lively

green color; never in-fested with insects, and very profuse in bloom. It will sow itself every year and come up in the same place. Pkt., 5e; oz., 20c.

Mammoth Flowering Verbena.

in The largest Verbena known, a single flower often being as large as a twenty-five kt., cent coin. For garden beds or effective massing, this Verbena is unequalled. (See description.)

## Summer Flowering Bulbs for Spring Ptanting.

For this list we have selected those bulbs which, while inexpensive, are most beautiful and most easily grown. Their culture is simple, and most of them flower the first summer. The bulbs may be kept over winter and will continue to multiply, year after year. A small investment in any of these bulbs will well repay the purchaser.

PLEASE NOTE CAREFULLY. All bulbs and roots will be sent by mail or express, charges prepaid, when or the purchaser paying the charges. Not less than six of any one variety supplied at dozen rates, and not less than 25 at the 100 rate. Orders with money should be sent as a searly as possible, and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over.

GOLDEN RAYED LILY OF JAPAN.

#### Lilies.

CULTURE. Plant as soon as frost is out of the ground, in fine rich soil mixed with sand. Set the bulbs from three to five inches deep, according to size. No water should be allowed to stand around the roots. Once firmly established, they will stand for years.

LILIUM AURATUM. (The Golden Rayed Lily of Japan.) Flowers are immense, 10 to 12 Inches across; very fragrant; color, ivory white, studded with crimson spots and a bright golden band through the center of each petal. Bulbs, 15c each; 2 for 25c; doz., \$1.30.

LILIUM RUBRUM. The famous "Ruby Lily" of Japan. It would be difficult to exaggerate the beauty of this glorious Illy. The six broad petals dotted with carmine spots; very fragrant. Bulbs, 15c each; 2 for 25c; doz., \$1.30.

LILIUM ALBUM. Pure white; very fragrant. Bulbs, 20c each; 3 for 50c; 7 for \$1.00.

LILIUM LONGIFLORUM. The pure white flowers resemble the well known Bermuda Easter Lily and are very fragrant. Bulbs, 15c each; 2 for 25c; doz., \$1.25.

LILIUM TIGRIMUM—SPLENDENS (Improved Single Tiger Lily). Has very large flowers of excellent form; color, orange salmon with dark spots. Bulbs, 15c each; 2 for 25c; doz., \$1.25.

LILIUM TIGRINUM—FLORE PLENO. (Double Tiger Lily.) This magnificent lily is of stately habit, bearing clusters of very large double flowers on tall, strong stems color, bright orange red, spotted with black. Bulbs, 15c each; 2 for 25c; doz., \$1.25.

JACOBEAN LILY (Amaryllis Formosissima). The brilliant deep scarlet flowers are often eight inches across, and in purity and brilliancy of color are unsurpassed. Bulbs, 15c each; 2 for 25c; doz., \$1.25. CULTURE. Plant as soon as frost is out of the ground.

#### Gladiolus.

On account of its intrinsic merit alone, the Gladiolus is entitled to the high rank it holds among flowers; but when it is considered, also, how easy is its culture, and for what a small sum a splendid assortment can be secured, it seems a matter of surprise that they are not found around every home. The flower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation very interesting.

CULTURE. They thrive in almost any good soil, except a stiff clay, require full sunlight, and are only liable to injury from rank mannre. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summar; in this way a succession of bloom may be had from midsummer intif frost. In autumn, before freezing, they should be dug and dried, the earth and old bulbs removed, and then stored in a cool, dry place, secure from frost, until spring.

N., K. & CO.'S IMPERIAL GLADIOLUS MIXTURE. Those who have had this mixture know it to be a grand one. For many years we have been adding to it from the new and high priced varieties as they made their appearance, and we mean it to include every desirable sort. It has been our experience that comparatively few people try the named varieties. So we have made a specialty of our Imperial Mixture, and the plan adopted in their material growth, by which they are cultivated much like potatoes or corn, enables us to offer them at a price ridiculously low, compared with what is asked for them ordinarily. At these prices they should go like hot cakes, 4 for 10c; doz., 25c; per 100, \$1.30, postpaid. By express or freight, per 100, 90e.

#### Choice French Cannas.

The marvelous improvement made in Cannas the last few seasons have seen no equals in the history of floriculture. From a mere description no adequate idea can be gained of the strikingly beautiful effect presented by their brilliant colored, immense sized flower heads. They commence blooming early in June and continue until late in Septemher. Every shoot bears a flower, and so often as a truss of bloom is past its prime another shoot pushes out beyond it, and each stem blooms three to five times in succession. We are now able to offer the great novelties of last season at less than half price. We arge our customers who have not already provided themselves with the New French Cannas, to give them a trial.

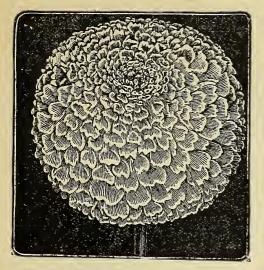

MIXED CANNAS, Scarlet flowered kinds, Many splendid colors, Each, 15c; 2 for 25e; doz., \$1.25. MIXED CANNAS, Yellow flowered kinds, Many shades, variegated, banded, etc. Each, 15e; 2 for 25e; doz., \$1.25.

NEW FRENCH CANNAS Only 15e Ench. 2 for 25c, Postpald.

GLADIOLUS

New Dahlias, 15c each; doz., \$1.60, Postpaid.

DAHLIAS. The extraordinary beauty of the new varieties of Dahlias that have been recently added to the already large and wonderfully varied list, have renewed the old time interest in this majestic flower. Certainly no flower is more worthy of special attention. Our assortments comprise all the positive colors, in most striking shades.

ostative colors, in most striking shades.

CULTURE. A good, mellow soil, thoroughly enriched with well rotted manure, and an abundance of water upon the plants as well as at the roots during dry, hot weather, is the secret of success. Water over head daily, or oftener, in hot weather. Splendid flowers in the hottest, dryest season is the result. The tubers should not be put into the ground until settled weather, say May 20. Will book orders any time, but will not fill until about May 1.

Each. Doz.

Each. Doz. .....18c \$1.80 Each. Doz.

Double Mixed.....15c \$1.60
Single Mixed.....15 1.60 Scarlet.....18  $\frac{1.80}{1.80}$ White.....18 Cactus Dahlias

(Mixed)... .18 1.80 CALADIUM ESCULENTUM. (Elephant Ears.) A striking foliage plant. Leaves very large, often three to four feet long and nearly as wide. Very effective on lawns. Each, 15c; doz., \$1.40. Extra large bulbs, each, 22c; doz., \$2.35,

postpaid. CULTURE. Plantin rich soil and water

freely.

OXALIS. Blossoms
throughout the summer and fall. Foliage graceful and pleasing. White and rose pink. Doz., 8c; 100, 44c, postpaid.

Excelsior Tuberose. Note Our Price: Each, 3c; doz., 25c; 100, \$2.00, Postpaid.

MADERIA VINE. (Mignonette Vine.) A climber with glossy green leaves. Flowers white and fragrant. Grows very rapidly and will cover the side of a small house in a single season. Each, 7e; 3 for 15e; doz.,

TUBEROSE. Double Dwarf Excelsion Pearl. The flowers of the Double Dwarf Pearl are larger and more numerous than in the common type. They are so fragrant that they perfume the atmosphere for some distance

doz., 28c; 100, \$2.00, postage paid. By express at purchaser's expense, 100, \$1.25; 500 @ 90c.

#### Here is Something New. Bulbs from Seed.

It is not generally known, even among flower lovers, that many of the best bulbs can be SUCCESS-FULLY GROWN FROM SEED. In this way not only can a LARGE ASSORTMENT be obtained at a TRI-FLING COST, but the purchaser will be rewarded with varieties UNKNOWN to any but bulb specialists. As an illustration of what can be obtained for a few cents, take the AMARYLLIS LILY, probably the most gorgeous and magnificent bulbous plant known. A single bulb of the Amaryllis would cost from 25 cents to \$1.00, according to variety. Our price for the seed is 18 CENTS a packet, and the purchaser will secure, instead of one bulb, seed sufficient to produce 100 BULBS OR MORE, and not of one variety, but OF ALL THE BEST VARIETIES, INCLUDING the NOTED VITTATA HYBRIDS, which are as yet unnamed, and among which will be found varieties of extraordinary beauty.

Space does not admit of anything more than the barest mention, or rather hint, of the surprising results which may be obtained from this unrequalled offer of Bulb Seeds.

sults which may be obtained from this unequalled offer of Bulb Seeds.

ALLIUM. Most beautiful for pot culture or garden decoration, and of the easiest culture. Our mixture includes Allium Album, Fragrans, Gigantium, Pendula, etc. Packet, 20 cents.

AMARYLLIS. Their immense flowers, richness of colorings and regal habit are simply incomparable. They throw up spikes from 18 inches to 3 feet high; bear enormous trumpet shaped flowers, averaging from 6 to 10 inches across. Some of the flowers are of rich and glowing colors, others are delicately shaded and superbly veined. Our mixture includes Belladonna, Graveana, Vittata, etc. Packet, 18 cents.

CANNA. These striking and fashionable flowers can readily be produced from seeds. The seeds are very hard and should be kept in boiling water for several hours. Our mixture embraces the Gladioli Flowered and New Hybrids; in all over 200 sorts. Packet, 12 cents.

CONVALLARIA. (Lily of the Valley.) Everyone knows this favorite plant, but it is not generally known that clumps may be produced from seed. Packet, 22 costs. cents

One of the earliest flowers of Golden yellow, striped, purple, pure white, etc. All varieties mixed. Packet, 15 cents.

FREESIA. Of all the bulbous plants the Freesia, in our estimation, is second only to Lily of the Valley, both in beauty and exquisite fragrance. The bulbs are easily grown from seed. Packet, 10 cents.

RANANCULUS. Unrivalled for lovely form and bright and attractive colorings. Packet, 22 cents.

GLADIOLUS (Mixed). One of the most interesting branches of Gladiolus culture is the growing of bulbs from seed. No special skill or care is required, and in the course of two or three years thowering bulbs will be secured. It is not only a very interesting and inexpensive way for securing a fine lot of bulbs, but there is almost sure to be found new sorts that are the result of hybridization, and, which could not be secured in any almost sure to be found new sorts that are the result of hybridization, and which could not be secured in any other way. The seed is from the finest flowers and embraces hundreds, or we might more properly say, thousands of markings and colorings. Packet, 12 cents.

IRIS (or Rainbow Flower). Has been named by one writer, "The Orchid of the Flower Garden." The flowers are of rich and varied colors. Our mixture of seed includes English, Reticulata, Histrio—charming species; Germanica, Helenae, Orientalis and many others. Packet, 20 cents.

LILLIUM. This is a mixture of seed of the various lillies, including Auratum, Longiflorum, Lancifolium, etc. Packet, 30 cents.

PAEONIA. These noble plants are exceedingly effective. Great improvements in these have been recently made, and those who are acquainted only with

centive. Great improvements in these have been re-cently made, and those who are acquainted only with the old fashioned Paeony will be delighted with the beautiful shades and colorings developed from this mixture. Packet, 25 cents. SCILLA. Among our most beautiful hardy spring bulbs. If grown in masses their flowers fairly carpet

the ground. Packet, 30 cents.
TULIP. The most popular, probably, of all bulbs.
Qur mixtures include many of the better known sorts. Gesneriana, both yellow and red. Packet, 30 cents.

THE LAWN, N., K. & Co.'s Primer No. 3, tells how to BUILD NEW .AWNS, how to REPAIR OLD LAWNS, how to KEEP LAWNS GREEN.

TESTED AS TO GERMINATION.

Absolutely the Best Lawn Seed that Experience can Suggest, or that Money can Buy.

N., K. & CO'S STERLING LAWN GRASS. We prepare three grades of Lawn Grass Seed, which are kept constantly in stock. The best of these mixtures is N., K. & Co.'s Sterling Lawn Grass, which has been used with the greatest success on thousands of lawns. This mixture is composed of a number of varieties best adapted to the purpose. Some of the grasses are early, others medium, and still others late. By this means, as soon as one variety has ceased to be at its best, others are ready to take its place. Another important point is that by the use of many grasses, a much heavier sward is obtained than is possible with any two or three sorts, as no matter how much of one kind of seed may be sown on a given space, it will only support so many plants. If another variety, however, is sown in connection with it, a largely additional number of plants can be maintained, as they thrive on different elements in the soil. This mixture is unequalled for tennis and eroquet grounds. Our Sterling, qt., by mail, postpaid, 35c; qt., by express or freight, 25e; peck, \$1.15; bu., \$4.00, bags included. In 5 bu. lots, \$3.75 per bu.

N., K. & CO.'S PARK MIXTURE. This is a fine mixture, the grasses used in its combination being equally as good as those in the Sterling Lawn Mixture, but not containing as many varieties or some of the higher priced sorts used in the Sterling Mixture. It has given excellent satisfaction, and we commend it to those not wishing as expensive a mixture as the mixture is composed of a number of varieties best adapted to the purpose. Some of the grasses

many varieties or some of the higher priced sorts used in the Sterling Mixture. It has given excellent satisfaction, and we commend to those not wishing as expensive a mixture as the Sterling. Ot., by mail postpaid, 25e; qt., by express, 15e; peck, 90e; bu., \$3.00.

N., K. & CO.'S LAWN GRASS. Good Mixed. Where a fine lawn is wanted, we always recommend that the best seed be used. There are places, however, that are not conspicuous and where all that is desired is a good, healthy growth of grass, where a cheaper mixture will answer every purpose. No better lawn grass for the money can be obtained than our Good Mixed. Ot., by mail postpaid, 20e; qt., by express, 10e; peck, 60c; bu., \$2.00.

SPECIAL MIXTURES. We are at all times glad to make up special mixtures of lawn grass to meet the requirements of existing conditions. We have been very successful in combinations of grasses for terraces, shady places, exposed situations, etc. (See page 63.)

QUANTITY REQUIRED. In order to secure quick and satisfactory results, a liberal quantity of Lawn Grass Szed should be used, as spots not seeded will surely be occupied by

quantity of Lawn Grass Seed should be used, as spots not seeded will surely be occupied by weeds. The usual rule is one quart for 300 square feet; four to six bushels for an acre.

<sup></sup>

Mr. W. M. Berry. Superintendent of Parks, Minneapolis.

OFFICE OF

#### BOARD OF PARK COMMISSIONERS,

MINNEAPOLIS, MINN.

January 10th, 1897.

NORTHRUP, KING & Co., Minneapolis.

Gentlemen:-During the past twelve years, in which I have been Superintendent of Parks of Minneapolis, our park system has been built, and we have been obliged to seed large areas to grass each year. It affords me great pleasure to state that during all this time I have found your Lawn Seed of a UNIFORMLY HIGH QUALITY, both as respects STRONG GERMINATING POWER AND sides producing Yours very truly, W. M. BERRY, Supt. FREEDOM FROM UNDESIRABLE SEEDS, besides producing a turf of FINE TEX-TURE AND GREAT DURABILITY.

The above statement from Mr. Wim. M. Berry, for the past twelve years Superintendent, of Parks of Minneapolis, and for fifteen years immediately preceding. Superintendent of South Park, Chicago, is a notable one, coming as it does from one of the most widely known and experienced park superintendents in the United States, and covering, as it does, tuctve years continuous use of our Lawn Grass Mixtures in large quantities.

TRANGERS visiting Minneapolis almost invariably comment on the BEAUTY OF ITS LAWNS, both in the public parks and about the private homes. In a very large degree their fine appearance can be justly attributed to the uniform excellence of OUR LAWN GRASS SEED. The following letters show what MINNEAPOLIS people think of our Lawn Seed:

Minneapolis, Minn., Jan. 3, 1898. NORTHRUP, KING & Co., Minneapolis.

Gentlemen: My lawn at Higheroft consists of about eight acres and was seeded with your Sterling Lawn Grass Mixture. It is a beautful lawn, entirely satisfactory to me, and much admired by those who see it. Yours very truly, FRANK II. PEAVEY.

Minneapolis, Minn., Dec. 20, 1899. NORTHRUP, KING & Co., Minneapolis.

NORTHRUP, KING & CO, Filmeapons.

Gentlemen: In building the new lawn about my louse last Spring, I used 21 bushels of your Sterling Lawn Seed and the results were most satisfactory, I also used 25 bushels of your Permanent Pasture Mixture. The benefit of using these mixtures is very apparent.

CLINTON MORRISON.

N., K. & Co.'s Terrace Mixture.

# Grass Mixture for Shaded

free with every or-der for lawn seed, if requested.

N., K. & CO.'S TERRACE MIXTURE. The secret of keeping terraces in good order is to get a good sod established, and not cut the grass too closely. Our "Terrace" Mixture is made np of rapid spreading, deep rooting grasses, which may be used either in combination with a regular lawn grass mixture, or scattered over the terraces to strengthen and supplement the grasses already established. Price, qt., 45c, postpaid. By freight or express, qt., 35c; peck, \$1.25; bu., \$4.00.

The accompanying illustration shows the Minneapolis Exposition building, the grounds in front being terraced to the street. The first year it opened, the management were anxious to have the grounds look as well as possible, but were in a quandary as to the terraces. We furnished them with our Terrace Mixture six weeks before the Exposition opened, with the result that on that day the terraces looked as though they had been established for several years.

THE LAWN (N., K. & Co.'s Primer No. 3.) sent Free with every order for lawn seed, if requested.

#### ARE THE GRASSES DYING? IS YOUR LAWN FADING?

If so, Do not Disfigure Your Lawn, Offend Your Senses, or Fill Your Ground with Weed Seeds by using Stable Manure, but apply EXCELSIOR LAWN DRESSING. EASILY APPLIED. NON-ODOROUS.

#### N., K. & CO.'S EXCELSIOR LAWN DRESSING

Is a fertilizer especially prepared for Lawns. It possesses in the highest degree and concentrated form those constituents best calculated to Nourish the Grass, promote its Luxurient Growth and the Dark Green Color so greatly admired. It is not only the Most Perfect Lawn Dressing that has been devised, but it is the most pleasant to handle, being Non-Odorous, so that its liberal use on a lawn cannot be detected by any unpleasant odor. Being dry and fine it is easy to apply, and imparts such a Vigorous Growth to the grass that two or three applications during the season at the rate of one pound to each 100 square feet of lawn keeps the grass in a flourishing condition throughout the season, and enables it to withstand the effect of the hot summer sun. We prepare but one kind of Lawn Dressing. This we do not believe can be excelled. It is put up in bags containing our brand. By express or freight, bag of 10 pounds, 75c; 25 lbs., \$1.50; 50 lbs., \$2.50; 10c lbs., \$4.50.

How to Apply the Excelsior Lawn Dressing.

How to Apply the Excelsior Lawn Dressing.

The first application should be made early in the spring, as soon as the frost is out of the ground. Care should be taken to scatter it evenly over the lawn, sowing it by hand. The first application should be made at the rate of 10 to 15 pounds fertilizer to every 1,000 square feet of lawn surface. If at any time afterwards it be noticed that the lawn is thin and light colored in spots, a further application of Fertilizer will speedily restore its color. The fertilizer works best if applied just before a rain. If applied, however, when the weather is hot and dry, the application should be made early in the morning or late in the evening, and the lawn wet down freely immediately afterwards. In seeding down a new lawn, apply broadcast, double the amount above mentioned, and rake it in thoroughly before sowing the seed.

The Lie of Excelsion Lawn Dressing on Flowers.

The Use of Excelsior Lawn Dressing on Flowers.

By its judicious use, the health, vigor and free blossoming character of flowers will be greatly enhanced. The result of its use on flower beds is quickly seen by the dark green leaves and high color of olooms produced. To fertilize bedding plants, stir a teaspoonful, or more, according to the size of the plant, into the soil about each plant, and repeat two or three times during the season. After the fertilizer is used, water the plants freal: the plants freely.

FOR HOUSE PLANTS. Dissolve one teaspoonful of Fertilizer in one quart of water, and use the solution freely around the plants, stirring the solution while applying. It may be applied as often as the plant seems to require it; once every ing Need of Fertilizer. week or ten days until they are in the desired condition.

Root of Grass showing the effect of using Excelsior Lawn Dressing.

Low in Price. Perfect in Operation. Unqualifiedly Guaranteed.

No 1.—Drill only, with handles, front wheel and markers.

Delivered to R. R. in Minneapolis, boxed, for \$6.00.

WE are pleased this season to be able to call special attention to a new line of Seed Drills and Cultivators, made by the Bacon Manufacturing Company. We are glad to do this because they are perfect tools, what we cannot only recommend but absolutely guarantee, and also because the manufacturers are not in the combination and we can offer these tools at prices so can offer these tools at prices so reasonable that anyone wanting a Garden Drill or Cultivator cannot afford to ignore the offer made below. REMEMBER, that we guarantee them to give PERFECT SATISFACTION.

No. 2.—Drill, with 5 teeth, 2 hoes and 1 Plow. (Cut shows Drill detuched.) Delivered to R. R. in Minneapolis, boxed, for \$7.50.

\*HESE drills are showing exceptionally fine sowing qualities, weigh but thirty-three pounds, and are very light running. By placing the large drive wheel behind, in pushing, the weight of the arm and drill are thrown upon it, insures a regular movement of the feed and materially lightens the work. The feed, which is entirely new, is not a modification of any in use, is simple, durable, easily adjusted, has no brushes, rubber or wire parts to wear and get out of order. Is of iron, and, from its peculiar construction, handles the most delicate seeds without uising or breaking. Can be varied to any amount, sowing evenly to the last seed. bruising or breaking.

No.3.-Cultivatorwith o.s.—Cultivatorwith single wheel, 5 teeth and 2 hoes. Deliv-ered to R. R. in Min-neapolis, boxed, for \$3.50.

No. 4.—Cultivator with double wheel, 5 teeth, 2 hoes and I plow. Delivered to R. R. in Minneapolis for \$5.00. No. 5.—Cultivator, with double wheel, 5 teeth, 2 hoes and 2 plows. Delivered to R. R. in Minneapolis for \$5.50.

## POULTRY FOOD. A celebrated Artist, when asked with what he mixed his paints, replied, "with brains." Precisely so does a progressive Poultry Keeper mix his rations.

CRUSHED OYSTER SHELLS. The most frequent cause of hens not laying is the absence in the food of Carbonate of Lime. As Crushed Oyster Shell is practically pure Carbonate of Lime, it supplies, when fed to poultry, this most essential element, and greatly aids in the formation of the egg.

#### Advantages Gained by the Use of Oyster Shells.

It provonts "Cholera;" it keeps the poultry healthy; it makes hens lay an egg per day; it prevents soft shell eggs; it prevents liens from eating their eggs; it unkes the egg shell strong enough to curry without breaking; it contains many essential components of the egg; it makes eggs larger and heavier. When you buy 100 lbs. of "STERLING" Brand Crushed Oyster Shelts, you get two lbs of Shelts, not 15 to 20 lbs, of dust and dirt mixed in, as our brand is specially cleaned. To get best results in Poultry Raising, the use of something of the kind is positively necessary. Every poultry house or yard should have a pan or trough full, so that the fowls can have access to them at all times. Put up in 100 lb, bags.

Our price, bags included, 80c per 100 lbs.

MICA CRYSTAL GRIT. Hens, having no teeth, should

MICA CRISTAL GRIT. Hens, having noteeth, should be kept constantly supplied with some sharp material to grind and masticate their food.

Mica Crystal Grit is superior to all other forms, as it is not only sharp and hard, but its properties are such that it acts as a tonic and contributes largely to the health and what their superior for 100. Use and productive power of the Fowl. Our price for 100 lbs. (bags included), 90c.

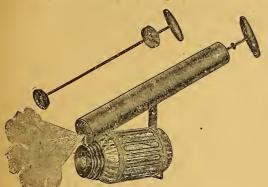

GROUND BONE. Per lb., 5c; per 100 lbs., \$3.00. Bags

# New Double Tube Insect Exterminator

FOR 1900.

They Exterminate Every Insect Obnoxious to Yourself, your Animals or your Grops.

Within the past few seasons it has been discovered and

Within the past few seasons it has been discovered and thoroughly proven that the proper way to apply insecticides is with a sprayer or atomizer; not only for economy of material, but that the work is performed far more effectively, as the spray will penetrate where the liquid cannot be applied direct.

During the last two seasons there has been an enormous demand for Sprayers. This has led to the construction of many Sprayers or Atomizers, some of which are good, some poor. We have carefully examined every well known Sprayer now on the market, as we wish to handle the best only. Our choice rested on the kinds herein offered, all Double Tube except where noted. The Double Tube Sprayers have double the capacity of any other sprayer made, covering a radius of 2 a feet, and producing two large sprays at one operation. They use less Paris Green and water than any other machine in existence on account of the spray being so fine. Not a drop of the water is wasted. A tablespoonful of Paris Green and two quarts of water is sufficient for 2,000 hills of potatoes.

NEW PERFECTION DOUBLE TUBE. —With Glass Reservolr. (See Cut.) This we regard as the best of all Sprayers, as it has a detachable glass reservoir. Its points of superiority are as follows:

First.—The operator can at all times see the ingredients mixing and just how they are working.

Second.—The glass reservoir being oblong, a "turning motion" is given while the Sprayer is being used. This mixes the ingredients and will not allow the Paris Green to settle.

Third.—The glass reservoir cannot covered a reservoir.

mixes the ingredients and will not allow the Paris Green to settle.

Third.—The glass reservoir cannot corrode or rust.

Fourth.—The glass reservoir is nothing more nor less than a Mason quart fruit jar, which screws into the cap. Should it break it can be readily replaced without loss of time and at a trifling expense. Price, each, 90c.

DOUBLE TUBE LIGHTNING EXTERMINATOR NO. 2. We have these made in two styles, viz: Galvanized Iron. Each 65c. This Sprayer has galvanized iron reservoir; the air chamber is made of heavy plate tin and is lacquered Copper. Each, 80c. Reservoir is coppered, and the entire machine is copper plated.

DOUBLE TUBE MINNEHAHA SPRAYER NO. 9. The tank is of large capacity, and made with a top like a milk can, which lifts off, enabling the operator to fill the reservoir instantly. Each, 60c.

No. 1 LIGHTNING ATOMIZER. This is a Single Tube Sprayer, low in price, yet effective and durable. It has detachable reservoir, enameled inside and out to prevent rusting. It is thoroughly practical and has given satisfaction to thousands. Each, 45c.

Our price on all Sprayers includes boxing and delivery to express or freight office at Minneapells.

Our price on all Sprayers includes boxing and delivery to express or freight office at Minneapolis, purchaser to pay transportation charges. Where seeds are to be sent at same time, a Sprayer can be put in without any appreciable extra charge for transportation. With every Sprayer is furnished complete instructions for use and formulas for emulsions, disinfectants, etc., the materials for which can be obtained cheaply at any drug store.

# MOLD'S NEW BLACK BEAUTY OAT

# A WONDERFUL OAT

ORIGINATED BY

W. H. MOLD

THE RENOWNED OAT SPECIALIST OF

ENGLAND

WHOSE SOLE AGENTS WE ARE FOR AMERICA.

FAC SIMILE OF GOLD MEDAL AWARDED MR. W. H. MOLD AT THE PARIS EXPOSITION OF 1889.

A FEW YEARS AGO our attention was directed to a remarkable variety of oats then being developed by Mr. W. H. Mold, the celebrated oat specialist of England. After some negotiation we purchased a part of his original stock. We became, at that time, the sole agents of America for all of Mr. Mold's specialties.

Mold's Black Beauty Oats mark such a distinct advance over all other varieties especially in point of productiveness and strength of straw as to set them apart and above all other oats. They are in a class of their own in the particulars above mentioned, are not approached by any other oat.

At the present time but few black oats are grown in America. Canada has found out how good they are and is now growing them quite largely. In most European countries they have decidedly the preference, and in England it is safe to say that three bushels of black oats are grown to one of white.

They are preferred by those who have had experience with them, principally on account of their superior yielding qualities, but besides being fully equal it not better than white oats in point of feeding qualities, they possess another very valuable characteristic in the unequalled stiffness and strength of straw. Nothing less than a tornado or cyclone will

Not wishing to put such valuable seed "in one basket" we placed a portion with two careful Minnesota farmers, Mr. J. W. Nesbit of Hennepin county, and Mr. A. Striefland of Scott county. Mr. Nesbit says: "All of my other oats lodged more or less, but those black oats stood up perfectly; the straw was as stiff as hazel brush. We took off from our three-acre field, seven large loads of bundles, about three times as much as any white oats we had."

Mr. Striefland says: "I thought I had seen big yields of oats but those black oats certainly do take the cake. They stand up like soldiers on parade."

Mold's Black Beauty Oats are the best of all the black oats. They are early, the straw is exceedingly strong and vigorous, and the head is extremely long. On account of its remarkable stooling propensities, two bushels are amply sufficient to seed an acre.

Our stock is small and as we desire to control these oats as far as possible, for at least another year, we this season offer these in sealed bags only at the following prices, delivered to any express or railroad office in Minneapolis: One bushel, \$3.00; two bushels, (sufficient for one acre.) \$5.00. Seamless sacks included. Not over four bushels sold to any one customer.

It is not a difficult matter for the purchaser to figure a large profit on an investment of \$5.00 for seed for one acre of this grand new oat. They should easily yield double the quantity of any ordinary white oat, and they would show a handsome profit even if sold or fed at the market price of ordinary white oats. We are nuch mistaken, however, if when your neighbors see these oats growing, and hear what threshers say about them, they will not want to buy all the seed you have to spare at any fair price you may choose to ask.

Our customers know, and our catalogues show, that we are conservative in our statements. We are also ready to back up any claims we make. We do so in this instance by making the following proposition, the like of which has never before been made by any house in introducing a new variety. We will refund the money paid us for these oats if the purchaser is not entirely satisfied with his investment. In every bag containing Black Beauty Oats will be found a card reading as follows:

Minneapolis, Minn., Jan. 1, 1900.

We will refund to the purchaser of these oats, the amount paid for same, in case they do not prove in every way satisfactory to said purchaser. The offer is good until January 1, 1901.

(Signed) NORTHRUP, KING & CO.

We expect to maintain a good price on these oats for at least two years, so that not only ourselves, but those who buy them this season, may receive good returns on their

Remember that these oats can be obtained only in our sealed bags, and we shall this season, sell only a limited quantity in small lots, as above stated. Positively not over two bushels to any one customer.

NORTHRUP, KING & CO., Seed Growers, MINNEAPOLIS, MINN.
